55550.

Mortality of the Metropolis.

A STATISTICAL VIEW

OF THE

NUMBER OF PERSONS REPORTED TO HAVE DIED,

OF EACH OF MORE THAN

100 KINDS OF DISEASE, AND CASUALTIES

WITHIN THE

BILLS OF MORTALITY,

IN EACH OF THE TWO HUNDRED AND FOUR YEARS, 1629—1831,

Shewing the Proportion reported to have Died in each of Thirteen gradations of ages in each of the 105 Years, 1728—1831, and the Total Number Buried in each Parish within the Bills of Mortality in each of the 176 Years, 1657—1831; with a Topographical arrangement of the Parishes comprising the Metropolis; the Population thereof at different periods; and the Number in each reported to have Died of the PLAGUE in each of the Four Great Plague Years.

1593, 1625, 1636, and 1665,

And also a Circumstantial Account of the still greater **PLAGUE of SPASMODIC CHOLERA** which desolated Asia and Europe between **1345** and **1362,** and Great Britain in **1348-9,**

ACCOMPANIED WITH A

VARIETY OF STATISTICAL ACCOUNTS,

Illustrative of the Progress and Extent of the

AMOUNT EXPENDED FOR THE MAINTENANCE OF THE POOR,

In each County of England and Wales, and in each Parish of the Metropolis, in comparison with the Amounts expended for the like purpose in several of the Principal Towns and Parishes of England, in each of a Series of Years from 1775 to 1830:

Together with an Abstract of the Parish Registers of the Metropolis,

Compared with an Abstract of those of the County of

LANCASTER, and the WEST RIDING of YORKSHIRE,

AND OF ALL ENGLAND AND WALES,

From 1700 *to* 1820;

And a peculiarly interesting Statistical Display of the *Number* and *Ratio* of *Marriages*, *Births*, and *Deaths* in each County of *England* and *Wales*, in each of Four Ten Yearly Periods, from 1780 to 1820, with the result of the Population returns of each Parish of the Metropolis, and each County of Great Britain, in 1831, *&c. &c. &c.*

INTRODUCTION TO THE STATISTICAL DISPLAY

OF THE

Diseases and Mortality of the Metropolis.

&c. &c. &c.

Abstracted from the prevailing excitement which the spread of Spasmodic Cholera from the banks of the Ganges to the shores of the Baltic, and at length to the North of England, has occasioned, my attention had previously been directed to the extent and causes of the mortality (rather than to the diseases) of the Metropolis, and having been favoured by a friend connected with one of the Insurance Offices with a complete set of the Bills of Mortality, published annually, for more than 200 years, by the Worshipful Company of Parish Clerks of the City of London, I was excited by curiosity, in the first instance, rather than by any specific design, to ascertain what their investigation might lead to and develope.

2. After much time and labour had been bestowed on the subject, I was restless until I had gone through the whole period, and thrown the details into a form to enable me to see clearly what conclusions could be drawn from them. Having done this, I deemed the exhibition both curious and interesting, and, having shown the details in manuscript to one or two eminent medical gentlemen, they encouraged me to believe that it was a development which the medical professors and practitioners, as well as the enlightened and liberal enquirers of all countries, would hail with grateful acknowledgement. I therefore resolved on their publication, which I have hastened in consequence of the prevailing excitement in regard to *Cholera*, and from a conviction in my own mind that their publication will tend to show the propriety and desirableness, independently of the prevalence of Spasmodic or any other peculiar disease, of measures being immediately adopted for obtaining the most accurate weekly returns of the diseases and mortality of the whole of this, now vast, metropolis.

3. A vulgar prejudice has for ages prevailed in regard to the unworthiness of the weekly and annual reports published by the Worshipful Company of Parish Clerks in London, under the title of "Bills of Mortality," from which the statistical display of diseases, here submitted to public attention, has been compiled. I shall, therefore, in the first instance, point out the origin of these reports, and then endeavour to show how far they are, or are not, entitled to regard. Parish registries of marriages, christenings, and burials, appear to have had their origin in England in 1538; and it was from the 21st of December, 1592, that the parish clerks of London first made a weekly return to the head of their fraternity, and first published the same in 1594, in consequence of the plague which prevailed in 1593: its publication was discontinued after the 18th Dec., 1597, the plague having then ceased. The first of the uninterrupted series of weekly bills commences on the 29th Dec., 1603, at which period there were only 13 out-parishes in addition to 96 parishes within the walls of the city of London, that of St. James's, Duke's Place, not being then included.

4. Subsequent to 1603, additional parishes were successively included, from which date an increasing interest appears to have prevailed respecting the weekly reports. The parish clerks of London had been incorporated as far back as 1233, under the title of the *Fraternity of St. Nicholas*; in 1611 they were re-incorporated under the title of the *Worshipful Company of Parish Clerks*, and, in 1625, their bills of mortality are stated to have acquired a general reputation. In this year the

company obtained a decree, under the seal of the High Commission Court, or Star Chamber, for the setting up of a printing press in their hall, in order to the printing of the weekly and general bills of mortality within the City of London and liberties thereof; for which purpose a printer was assigned by the Archbishop of Canterbury, and in this year, 1625, the number of burials in every parish was, for the first time, published; all that was done previously having been merely reporting the aggregate weekly number, as exhibited at pages 65—7.

5. The report of *Diseases* and *Casualties* was first published in 1629, and from this date the accompanying display commences; at this time 26 parishes in addition to the 97 within the walls of the City of London (St. James's, Duke's Place, being now included) made weekly returns, see Nos. 1 to 27 of the statement page 68, which page shows the years the additional parishes were included; such was the origin and progress of the account of the burials and diseases of that part of the Metropolis within the bills of mortality from 1592 to 1629, since which date a copy of the returns has been sent weekly to the Secretary of the Home Department of State, and the Right Honorable the Lord Mayor, and an annual account has been, and still continues to be published, and generally circulated, by the several parish clerks, amongst their fellow-parishioners, under the imposing title of

A General Bill

OF ALL THE

CHRISTENINGS AND BURIALS

WITHIN THE

CITY OF LONDON AND BILLS OF MORTALITY,

from December , to December

ACCORDING TO THE REPORTS MADE TO

THE KING'S MOST EXCELLENT MAJESTY,

AND TO

THE RIGHT HONORABLE THE LORD MAYOR;

BY

THE WORSHIPFUL COMPANY OF PARISH CLERKS.

6. It seems not unreasonable to suppose that an account published under such distinguished sanction, in a city claiming the highest character for intelligence, public spirit, and all other qualities which give consequence and importance to society, and on a subject in which all have a common interest, would deserve, in a very high degree, the regard of the community at large, and especially so of the enlightened and enquiring portion of it. If it should prove that the returns have not been made with all the accuracy of which they have been susceptible, and which the subject demands, it is hoped that the perspicuous form in which their contents are here exhibited will serve to obtain accuracy for the future; and it must be obvious that the submitting to public attention from week to week, or from time to time, an accurate view of the extent of mortality, and nature of the diseases which occasion it, would tend to prepare the public mind to meet with calmness and fortitude any new disease, however inscrutable and severe, which nature, in its ever varying course, may occasion; and that such a display of the extent and cause of mortality would also operate as an additional stimulus to the genius and energies of the medical practitioners, to endeavour to allay and arrest the progress of disease in whatever form it may appear.

7. Proceeding now in the endeavour to show how far the accounts, such as they are, are entitled to regard for their accuracy, the subject presents itself in two points of view. First in regard to the proportion which the total number of *Burials* bears to the Total Population out of which the deaths have occurred; and, secondly, in regard to the *Diseases* or *Casualties* by which the deaths were occasioned. However imperfect the returns of the number of burials may have been, if the diseases and casualties which occasioned the demise of those returned as buried have been correctly made, the interest of the Statements of Diseases, as herewith exhibited, may be considered as not materially, if at all, affected by any defect in the return of the aggregate number of Burials, and I will therefore, in the first place, proceed to show the authority upon which the report of diseases is founded. Considering that a weekly return is made to the Secretary of State, and that a general bill is published annually under such exalted sanction as the KING'S MOST EXCELLENT MAJESTY of the most powerful empire, and the RIGHT HONORABLE THE LORD MAYOR of the most populous, opulent, and enlightened, city in the world, it is natural to suppose that the office of reporting would be assigned to some of the most acute, discerning, enlightened, and industrious, of its medical professors; but what will the distant enquirer say when I inform him, as it is my duty to do, that the reports rest upon the authority of a parcel of elderly females, designated *Old Women* by those who indulge in vulgar prejudices against the returns?

8. It may serve, however, in some degree, to assuage English vanity to know that, over the greater part of Continental Europe, the duties of attendance during *parturition* are wholly performed by Females, who enjoy a respect and distinction in society beyond that of the Male Practitioner in Physic and Surgery. Why then should the Reports of Diseases in London be impugned for being made by Females? In a general sense, it affords no justifiable ground of objection; nor have I, from repeated opportunities of personal observation, and particular enquiry, been able to discover any justification for that indiscriminate censure and disregard which prevail in the Metropolis respecting them. But, admitting it to be justifiable, let it be asked, with whom does the odium rest?

9. The rule adopted by the Parish Clerks, from the commencement of their proceedings, has been to appoint two Females, whom they denominate *Searchers*, in each Parish, under the sanction of the Parochial Authorities, which Searchers, on a death being announced, visit the house of the Deceased, and inspect the Body, enquire the age, and disease which occasioned the demise; the inspection of the body being intended as a guard against death being occasioned by violence. Such being the course of proceeding, what more could be done by the most skilful Medical Practitioner, except by the one who attended the person previous to demise? No rational motive is discoverable for misrepresentation, except in some few cases, perhaps, of a desire on the part of the friends of the deceased to conceal the fact, when the death may have been occasioned or accelerated by *venery*, or indulgence in some vicious practice; but such cases, supposing them to occur at all, will, of late years, at all events, have been too few to affect the general interest of the Display herewith exhibited. The *Searchers*, so called, are personages, not perhaps possessing the first order of mental acquirement and discrimination, but possessing plain good sense, matronly deportment, and much practical experience in diseases, affording as fair a guarantee for exactitude in their reports as is likely to be obtained in any other manner, without consulting the medical practitioner by whom the deceased was attended previous to demise: a Medical Practitioner would probably report more *technically*, but not more intelligibly. This vindication, however, of the worthiness of the Searchers' reports must, after all, be considered as applying generally to the integrity of the question, rather than to that exactitude and nice distinction which the subject so imperatively deserves.

10. *The Note at the head of Page* 67 *refers to this Section for Historical Details of the Great Plague of* 1345—1362. *See Section* 20.

Could the Display herewith exhibited be viewed with confidence in respect to unerring accuracy, in the distinction and specification of the Diseases, and the numbers reported under each head, it might justly be regarded as the most interesting Statistical Picture ever submitted to human attention; and

more particularly so, could it have been accompanied by a corresponding display of the changes, extremes, and general state of the atmosphere in each year during the same period. However much the want of implicit confidence respecting the diseases, and the absence of all information on the state of the atmosphere, may, at the present time, be subjects of deep regret in respect to the past, it is to be hoped that the Display, such as it is, will superinduce such information, on both those points, as shall merit the most unqualified confidence for the future.

11. The most interesting features of the Display of the Diseases, as herewith exhibited, will be found to consist in the seeming uniformity of some, the extinction of others, and the seeming origin of new ones, as well as the manifest aggregate diminution in relation to the aggregate Population. To ascertain the exact relative proportion of any disease at one time compared with another, or the exact relative diminution in the aggregate, correct knowledge of the Total Population at corresponding periods is requisite; but here, unfortunately, information entirely fails, prior to 1750, and partially so up to 1801. The statement at Page 12 shows the Total Population of all the Parishes within the Bills of Mortality at different periods, commencing with 1700; but as Returns of Burials from the whole of the Parishes were not made until 1729, and the population of the Parishes separately was not given, all fair comparison is precluded. It appears, by the statement just referred to, that the Total Population, from 1700 to 1750, rather diminished than increased, and in the City of London within the Walls remarkably so; but, at the former period, the Four Parishes in Surrey, Nos. 15—18, page 68, were, in all probability, included in the City within the Walls: those Parishes under the distinction of the *Ward of Bridge Without*, were considered, previously to 1700, as part of the City; but in 1750, and subsequent thereto, they have been included under the head of the *Out Parishes* within the Bills of Mortality. According to an enumeration which seems to have been carefully made in 1631, the Total Population of the whole of the City of London, both within and without the Walls, including the Four Parishes above referred to, or the whole 1—18 as exhibited at page 68, was 130,178; which, in 1700, is represented at page 12 as amounting to 208,300.

12. From the preceding data, and statement of Burials, as exhibited at page 67, it appears that the proportion of deaths to the Total Population of the City, in 1631, was as 1 to 21; and, in 1700, as 1 to 24; while the proportion of Burials in the whole of the Metropolis, according to the Statements at pages 62, 63, and the Statement of the Population at page 12, was as 1 to 33 of the Total Population in 1700; 1 to 26 in 1750; and as 1 to 52 in 1820. It must be observed, however, in regard to the otherwise seeming disparity between the proportions of Burials in 1750 and 1820, that the two Metropolitan Counties of Middlesex and Surrey, in the twenty years 1801—1820, received an accession of more than 375,000 Inhabitants, as immigrants from other parts of the United Kingdom, &c.; and this, it will be seen on reflection, without, comparatively speaking, any material increase of Deaths. From this also it may be inferred not only how difficult it is, but how entirely futile it must be, to attempt to establish, with arithmetical precision, an exact scale of proportion which the deaths bear to the living, not only in the Metropolis, but in any particular district where the facilities of intercourse and tendency to change of location so extensively prevail.

13. It may be further observed, with respect to the proportions exhibited in the preceding section, that their credibility may be affected by the probable imperfection of the returns of the number of Burials, since 1750. It is well known and admitted that the Returns made to the Parish Clerks have been very deficient, and on reference to page 63 it will be seen to what extent they have been defective; one statement in that page showing the number as returned to the Parish Clerks, and another showing the number as returned to Parliament from the Parish Registers, and from all the Dissenting, and other private Burying Grounds: the Ratios exhibited in Section 12 are founded upon the amended and corrected Returns.

14. It is stated, in Section 7, that the defect in the Return of the Total Number of Burials is a question totally distinct from that of a defect in the Reports of Diseases; the latter are not so much affected

by a defect in the Return of the Total number of Burials, as the Return of the Total number of Burials is by any defect in them, to the Total Population; except in the case of Women dying in Childbed, which case also deserves to be estimated in reference to the Total Number of Births, rather than to either the Total Population or Total number of Burials. The number of Deaths in Childbed are exhibited in the first column in each of the four periods of the Display of the Diseases; and forms not one of the least interesting features. The annual average of Deaths in Childbed during the first period was 234, and in the fourth, or last period, 201: the number of Births being nearly as two in the latter period to one in the former. The Abortions and Still-born are more uniform. The first and second periods exhibit a Column headed *Chrisomes and Infants. Chrisom* is a Greek word, signifying an ointment, used apparently to supple or soften the first garment or cloth of Infants at their birth: its use in the first instance probably emanated in kindness, and was afterwards converted into a superstitious practice, by the Priests of both the Greek and Romish Churches. The Custom appears to have been, to use the anointed, or *Chrisom Cloth* for one month from the birth of the Child, and, if the Child died within that month, it was stated to have died in *Chrisome.* This ridiculous custom, it will be seen, gradually decreased in the Metropolis of England from 1629 to 1726, when it became quite extinct. As the number of Deaths reported in *Chrisome* decreased, those under the head Convulsions will be seen to have increased, the cause of Death in both cases probably having been the same.

15. The great number reported from 1647 to 1752 to have died of *Teething,* and the progressive diminution since the latter date, form a feature deserving attention, as does also the gradual to total extinction of *Rickets,* after much prevalence from 1647 to 1715; and generally the diminution of diseases *incident to infancy* may be regarded a circumstance as honorable to the assiduity and integrity of the Medical Practitioner, as it is gratifying to the Friends of social Improvement. There are, however, some indications of Nature seeming determined to cross the purposes of the Medical Practitioner, in despite of all his assiduity: *Coughs, Croup, and Dropsy in the Brain,* all indicate a determination, since 1790, to fill up the void of Mortality which the diminution under the head of *Convulsions* otherwise seems disposed to occasion. *Dropsy in the Brain,* in particular (see Col. 10, Period IV), appears to deserve attention: how far this Disease may have been confounded with Convulsions, or otherways, prior to 1790, is a point which I must leave to the Medical Professor to determine. In the three preceding periods it is reported under *Headmoldshot, Horse Shoe Head,* and *Water in the Head*;—and its prevalence, as reported from 1715 to 1752, and gradual diminution, almost to extinction, subsequent to the latter date, form another feature deserving of notice.

16. In the third period, from 1740, to 1789, I have placed, from the statement at page 70 (showing the number of Burials within the Bills of Mortality, in each of the thirteen gradations of ages), the number reported to have died under two years of age in parallel columns, and in *juxta-position* with the Total number Reported to have died of diseases incident to infancy. So placed they will be seen to afford very interesting evidence of reciprocal confirmation of an approximation to accuracy, not only to those cases separately, but to the Returns at large. The Returns of ages commenced only with 1728; the comparison therefore cannot be made retrospectively; but, from 1790 to 1831, the comparison serves to strengthen the confirmation and credibility of the whole.

17. *Consumption,* which forms so prominent a feature in the Catalogue of Diseases, may be regarded as remarkable for its uniformity, and more particularly so if viewed in relation to Asthma and Phthisic, with which it is blended from 1690 to 1700, and 1729 to 1739. Prior to 1690 Asthma is not specified; in the three latter periods Consumption, and Asthma, and Phthisic, are placed in juxta-position. From 1629 to 1710, the eruptive fevers, *Small Pox* and *Measles,* are as remarkable for their variableness as some other diseases are for their uniformity. Subsequent to the introduction of inoculation, the Small Pox became far more general and confirmed in its virulence, which continued up to the period of the introduction of Vaccination, since which time it has gradually abated; but it is a fact, which seems in

a very high degree to deserve attention, that the *Measles*, which continued exceedingly variable and moderate down to 1800, since that date (notwithstanding, as is fair to be presumed, the improved treatment of the Disease) have become greatly increased and confirmed in virulence. The increase of *Erysipelas* also, as one of the order of Eruptive Fevers, although at present inconsiderable in its effects, is not undeserving of notice.

18. From 1629 to 1689, *Fevers* seem to have been exceedingly variable; from the latter date, down to 1750, more uniform and general; and, since 1750, down to 1831, gradually to have diminished; while *inflammatory* disease has increased in a greater ratio than Fever has diminished. Supposing the distinctions to have been properly made in the Reports, the decrease of fever, and increase of inflammation, are features of peculiar interest, and may be regarded as additional evidence of the inscrutable working of Nature, and its ever-varying, yet uniform process. *Dropsy* appears to have progressively increased from 1629 down to 1750, subsequent to which date it seems to have somewhat abated, but manifests a tendency to increase again since 1810. *Paralysis* (see Col. 36, Period IV.) shows a marked increase since 1790.

19. The *Spasmodic Diseases* now claim attention; under this head Columns 16—19, 28, 37, and 65, 66, in the first period 1629—89, should all properly have been placed, unless Col. 19 be excepted. In the subsequent period the *Spasmi* will all be found under their proper head. As these diseases all bear so close an analogy to the *Cholera*, which at present prevails in the North of England and Scotland, and which, at different periods, under the name of the *Plague* or *Pest*, has occasioned great ravages in different parts of the World as well as in England, it may not be out of place here to exhibit a general view of the periods of its prevalence. The term *Plague or Pest* is so familiar to all acquainted with the Geography and History of the Levant, Asia Minor, and Constantinople, as to render a recurrence to those parts of the world inseparable from a remembrance of the disease in question; and, to treat of the latter to the extent to which it has there prevailed, it would be necessary to give an annuary of their Mortality for the last five centuries. It appears during such a period, down to the present time, to have been what it was in England from 1593 to 1740, as exhibited at pages 66-7, and columns 65-6, first period, and 75—80 in the second period; that is, never extinct, and occasionally manifesting itself with unusual virulence.

20. One of the great ravages of this still inexplicable disease occurred at Athens, in the year 430 B. C. In the year A. D. 80, it committed great ravages at Rome; and again in 167 it produced the like effects over the greater part of the then vastly extended Roman Empire. It committed great ravages in Britain in 430. But all its effects, both before and since, appear to have been greatly exceeded between 1345 and 1362; and in England between the 1st of August, 1348, and the 1st of September, 1349. This remarkable devastation first broke out in 1345, in *Cathay* [Western Tartary] whence it spread west, north, and south, over every part then known to be habitable of Western Asia, Africa, and Europe The consternation which it produced, and its various modes of action, were so well described by an accredited Greek historian of the time, *J. Cantacuzenus*,* that I shall here insert the account as translated by a seemingly faithful English historian† of the 17th century.

* J. Cantacuzenus was born in 1295, of a distinguished family in Constantinople. His liberal and elegant acquirements early in life obtained for him great respect and influence at the court of the Eastern Empire then held in that city. The government descending in 1341 to a minor, John Paleologus, Cantacuzenus was appointed Regent, which situation brought upon him the malice of all the servile courtiers with which Constantinople at that time abounded, from whose conspiracies he was compelled to retreat. He inherited from his family vast wealth, all of which was confiscated; to which spoliation he appears to have been disposed to have reconciled himself on condition of being permitted to return to Constantinople, and pursue, in peace and quietude, his indulgence in literary pursuits. But, these conditions being refused him, he put himself in an attitude of self redress, and after varied turns of fortune re-entered Constantinople in triumph in 1347; but such was his predilection for, and love of peace, that he appears voluntarily, in 1355, to have withdrawn himself from the cares and turmoil of government, by retiring to a convent, in which he is stated to have died in 1411, after living, if the dates of his birth and death be correct, to the great age of 116.

† Joshua Barnes, Fellow of Emanuel College, Cambridge, who published at Cambridge, in 1688, a voluminous History of the Reign of Edward III.

21. "This plague, taking its rise from the Scythians or Hyberboreans, overran almost all the sea coasts of the habitable world, and destroyed an incredible number of people. For it did not only pass through *Pontus*, and *Thrace*, and *Macedonia*, but also through *Hellas*, and Italy, and all the Isles; and Egypt, and Lybia, and Indæa [Ethiopia], and Syria, and in a manner all the world round about. But it was such an unconquerable evil, that neither any diet nor strength of body could resist it; for it pulled down all bodies alike, as well the strong as the weak, and those who were most diligently looked after perished as well as those who wanted all things. That year was free from all other distempers; but, if perhaps any person was sick before, all other distempers terminated in this. Here the knowledge of the physicians was put to a stand: for some, enduring a little, died the same day, some the same hour; but those that held out the second or third day were first taken with an acute fever, and, the distemper getting up into the head, were rendered speechless, and insensible to all that was done; and so dropt off as it were in a profound sleep. But, if any ever came to themselves a little, they endeavoured to speak something, but the tongue was with difficulty moved; and so uttering many inarticulate things, the nerves being stupified in the hinder part of the head, they presently died. Others were not taken in the head but in the lungs: these had an inflammation in their inwards, which created acute pains about the stomach, so that they sent up blood and a loathsome and cadaverous stink from within; their jaws and tongues were dried up with heat, and black and tainted with gore; and whether they drank much, or little, it was all alike: these could take no sleep, but were in continual pain and disquiet. Some had imposthumous ulcers, and black blisters, bigger or lesser on their arms and under their armpits; and some in the cheeks, and others in other parts of the body. And in others there arose black nodes, spots, or tokens, over all the body, in some more superficial and visible, in others deeper and obscure: and yet of both sorts all died alike; for some had all these symptoms together, others more or less, but to most even one of all was enough to do the business. Yet those few who recovered were no more touched with the same mischief, but remained secure; for it never took any twice so as to kill. Sundry times there were great imposthumes in the thigh, and in the arms, which being cut sent forth much stinking matter; and so the disease was carried off, flinging forth together therewith all the noxious humours. And yet some, though they had all these symptoms, were beyond all expectation saved. But there was no certain remedy: for what was good for one was to another in the same condition fatal: yet he that cured another got his own death thereby, and this made the greatest havoc, so that houses were emptied of inhabitants, even brute creatures dying with their masters. Yet nothing herein seemed more dismal than the despair to which men were reduced: for when any one perceived himself sick he abandoned all hopes of recovery; and thus they gave themselves over and died presently, adding their defection of mind as an assistance to the disease. Such a kind of malady cannot be expressed; and it was most manifest that it was not any plague natural or common to mankind, but a scourge from heaven: wherefore many also were bettered thereby, not only of those who died, but as many as survived. For then, casting aside all their vices, they applied themselves wholly to the study of virtue, and several gave all they had to the poor. But, when any found themselves affected, there was none so stony or so obdurate but that he repented heartily of his sins, and thereby gave the Divine goodness some occasion of being gracious at his tribunal."

22. The date when the preceding account was written does not distinctly appear, but it is highly probable that it was written in 1346, previous to its author's triumphant entry into Constantinople in the following year. Naples, and Avignon, appear to have suffered in an extreme degree; at the former place 300,000, and according to some 400,000 persons are stated to have perished; and Avignon, which was at that time the seat of the Papal see under Clement VI., was nearly depopulated. Of the members of an English College, then existing in that city, not one escaped, and upwards of 1200 citizens died in one day; and, according to an official report made to Pope Clement, 23,840,000 persons are stated to have died within the pale of the See in one year [1347]. The report significantly

concludes by stating, that "No Physician could tell the cause, or prescribe a cure: *what was saving to one was fatal to another.* No Astrologer could divine how or when it would cease."

23. As might be expected under such a fearful visitation, craft and ignorance propagated every kind of Hyperbole. The following account was disseminated from Florence, in which City 60,000 persons are stated to have fallen victims to its ravages: "It had its origin in Cathay by reason of a certain igneous vapour, or sulphureous fire, horribly breaking forth from the Earth (*or*, as others, descending from Heaven) which utterly consumed and devoured men and beasts, houses, stones and trees, to the very ground itself; and stretched forward, rolling along in smoky globes of horrid stink, and pestilential fire, for more than 200 leagues of the country, or fifteen days' journey together; whereby the air became so infected in those parts that there fell down some millions of young serpents, and other venomous insects; and in other countries, more remote from this fiery eruption, were found infinite quantities of *huge* vermin,* with eight short legs, and tail, all over black, some living and some dead, the latter whereof stank over all the country; and the former were not only most dreadful to behold, but whomsoever any of them chanced but to touch, they became immediately to them as mortal poison." This account is said to have been communicated from Asia to a citizen of Florence.

24. The History of the period is replete with accounts of atmospheric and other Phenomena as well as Hyperbole in what relates to the virulence of the Plague: it is stated that an unusual atmospheric phenomenon hung over Avignon, on the 20th of December, 1348; that in Germany, in the same year, it rained blood, and that "comets, meteors, fiery beams, and other coruscations appeared in the air, with divers mock suns, and the Heavens seeming to burn." In the same year, earthquakes appear to have prevailed at Rome, Naples, and generally over all the south-east part of Europe; violent storms in 1353; and a remarkable eclipse of the moon, from half-past four to half-past six A. M., occurred on the 17th February, 1355. In the following year earthquakes were again general in Germany, Spain, and the south-west of Europe. On the 21st April, 1359, the bishop and priests of Sienna were struck dead in a violent storm, while in the act of performing high mass in the Cathedral; and it is gravely stated that the chalice and cross were struck so deep into the ground that they could never afterwards be found!! In the present day a *crucible* would solve the latter mystery.

25. That the disease was terrific in its ravages, and various in its process and modes of action, there seems no valid reason to doubt; yet some allowance must be made for the exaggeration which terror and consternation, under all circumstances, are so strongly calculated to excite. In some districts the effects of the disease are stated to have been 2 deaths out of every 3 of the Population; in others 4 out of 5; in others 9 out of 10; in some cases, 19 out of 20; and an extensive district of Mesopotamia is stated to have been entirely depopulated, the pestilence having left only a few females who destroyed each other in their frenzy; and in evidence of its various and opposite modes of working, in addition to the lucid description of Cantacuzenus, see section 20. Another account states, that "It took men generally in the head and stomach, appearing first in the groin or under the arm pits, by little knobs or swellings, called kernels, being biles, blains, blisters, pimples, wheals or plague sores, generally attended with pestilential fever, which occasioned spitting and vomiting of blood; at Avignon it is stated to have been attended with bleeding at the nose, mouth, and fundament; that the Rivers ran with blood, and that streams of putrid gore issued from the Graves and Sepulchres of the dead—while in other cases it is stated to have produced pimples, hard and dry, with but little purulent matter, and, in one District, that all living creatures perished, and became as hard as stones.

* These would probably be *locusts*, which in recent times have occasionally emerged from the dense forests of Tartary and parts of Africa, and desolated extensive districts, both East and West. Chensi, a north-west province of China, is frequently subjected to desolation by these animals. The Canary Islands, so recently as 1812, suffered greatly by them, and their destruction of all vegetation was followed by a pestilence:—this species of locust is a *small* insect, but the consternation of the period, 1345—50, would readily magnify it into *huge* vermin.

26. The numbers Reported to have fallen Victims to the disease, in different parts of the World, supposing them to be accurate, or nearly so, would at this distance of time be exceedingly interesting, as serving to show the former importance of places now become comparatively insignificant. In Venice 100,000 persons are stated to have perished; in Lubeck, 90,000; in Paris 50,000; St. Denis, 14,000; in Germany, 1,244,434; in the City of Norwich, between the 1st of January and the 1st of July, 1348, 57,104, or, according to another account, 57,343; in Yarmouth, 7052,—the circumstantiality of the numbers, in the two latter places, increasing their credibility. Respecting this Virulent Distemper, Hume, Guthrie, and one or two other voluminous historians are entirely silent. In a collection of English Histories, published in London in 1706, is the following Account, viz., after speaking of the exultation consequent on the success of the English Army on the field of Cressy, in 1347, and the subsequent surrender of Calais, in 1348, the Historian states, "But before the end of this year England's mirth was turned into bitter mourning by the invisible Sword of Heaven. A contagious Pestilence which, first beginning in the East and South parts of the World, spread into all parts of Christendom, and raged so violently in England that it is said to have destroyed more than half of its inhabitants, so that the church-yards were not large enough to bury the dead, but they were forced to purchase new ground for that purpose. In London there died, in six months, 57,354* persons, and other Cities and Towns suffered as deeply according to their proportion of Population. This Plague was attended with as mortal a Famine, Murrain of Cattle, and Barrenness of the Ground, caused through the Contagion of the Air, and want of Husbandry."

27. *Rapin*, Book X., after treating of the Affairs of Cressy and Calais, adverted to in the preceding Section, has the following paragraph:—"During the prosperity enjoyed by the English, it is no wonder that ease and plenty threw them into the excesses that are the usual attendants thereof. All the Historians unanimously affirm that an unbridled debauchery at this time prevailed throughout the kingdom, and the women laying aside their modesty, the great ornament of their sex, seemed to glory in the loss of their virtue. Nothing was more common than to see them riding in troops to the Tournaments, dressed like Cavaliers, with swords by their sides, and mounting their steeds, adorned with rich trappings, without any regard to their honor or reputation. The men's excesses were no less scandalous. God permitted not these disorders to go long unpunished. A terrible plague, after raging in Asia, and part of Europe, spread itself into France, and from thence into England, where it made such desolation, that one half of the nation was swept away. London especially felt the effects of its fury; it is observed in one year [1348-9] above 50,000 persons were buried in a church-yard belonging to the Cistercians."†

28. On the 1st. of August, 1348, this seemingly unexampled Calamity commenced its devastation in England, on the Dorsetshire Coast, whence it spread Westward along the Coast of Devonshire, and soon became general over all the Western Counties, and, within six months, over every part of England. It first appeared in London on the 1st of November, after having broke out at Oxford: it appears not to have commenced its ravages in Norwich until after the 1st of January, 1349. At Leicester it appears to have been very fatal; its desolating consequences may in some degree be in-

* This number, it will be seen, corresponds nearly with the number just before stated to have died at Norwich; according to *Rapin*, see Section 27,—above 50,000 persons are stated to have been buried in a churchyard belonging to the Cistercians:—see, however, Section 35.

† Not so. The ground appropriated for the interment of the dead, on this occasion, was a field of 13 acres 1 rood, called *Spittle Croft*, belonging to the Master and Brethren of St. Bartholomew Spittle, from whom it was purchased by Lord Walter Manny, a distinguished Captain and Courtier of his day, by whom, or by whose descendants, it was subsequently conferred on a body of Cistercians. In the present day it forms an extra Parochial District [the CHARTER HOUSE]. surrounded by the Parishes of St. Botolph without Aldersgate, St. James and St. John Clerkenwell, and St. Luke. See Nos. 10, 34. 37. 38, page 2. The Charter House Buildings retain all the characteristics of a Monastic and by-gone age; while the ground is surrounded by a high brick wall, forming one of the greatest nuisances of the Metropolis; the more annoying inasmuch as there is no part of the Metropolis which affords a more favorable opportunity for tasteful, or even splendid Architectural Display; none more requiring improvement, nor any where it would be attended with greater advantages,—both as respects reward for individual enterprise, and public utility.

ferred from the diminution which it occasioned in the value or Money price of all commodities. In the *Chronicon Preciosum*, published in 1707, it is stated that in the Pestilence [1348] things were sold almost for nothing. A Horse worth 40*s.* was sold for 6*s.* 8*d.*, a Cow for 1*s.*, which in 1344 would have sold for 5*s.*, and so in proportion for all other things; both cattle and sheep, however, appear to have fallen Victims either to the Disease, or to hunger occasioned by want of attention and provision during the Winter; it is mentioned that 5000 Sheep perished in one district. The loss of animals, and the seeming suspension or limitation of Agricultural pursuits, in 1349, after the Pestilence had ceased, which it did before the end of August in that year, occasioned the price of Provisions to rise again to a degree that exposed to the risk of Famine those who had escaped the Pestilence; but, as the people soon recovered their wonted energy, liberal supplies of Corn were obtained from distant parts, whereby confidence and activity soon again became permanently re-established. The Scots, between whom and the English great strife at this period prevailed, attempted to take advantage of the Consternation in which the Pestilence had involved the English, by marching a considerable body of Troops into the North of England, which Troops immediately became infected with the Disease, so that they were soon glad to return, carrying back with them the Pestilence, as the merited reward of their enterprise. In Ireland the Plague appears to have committed great ravages among the English settlers, while it affected the Native Irish but very partially.

29. Although this unexampled Pestilence is stated to have raged in different parts of the World, from 1345 to 1362, its Virulence appears to have considerably abated after 1350, and in England entirely so before the end of August, 1349; and the Mortality in other parts, subsequent to the latter date, was probably occasioned as much, or more, by the privation and destitution of all social comfort, in which such a calamity was calculated to leave large numbers of Survivors, as from any marked or Specific Pestilential Disease. See Column 66 of the first, and 75—81 of the second, Periodical Display of Diseases, for the effects which the Plague of 1665 appears to have left behind it: all those Diseases, as well as those in Columns 16—20, and 28, in the first period, appear to have been consequences of the more virulent effects of the Pestilence which committed such ravages in the Year in question [1665]. One of the worst features to which the Pestilence of 1345—50 gave rise, was the accusation of different Sects and Parties of Poisoning the Waters, and other similar Mal-practices, and assigning to them the cause of the desolation which had prevailed. Both Christians and Jews, in their turn, appear to have been persecuted unto death in great numbers. At Mentz 12,000 Jews are stated to have fallen victims to the fury of an ignorant and brutal populace, under the pretext of their having poisoned the waters of the wells of that city.

30. In Section 63 it is stated that in Florence more than 60,000 persons fell victims to the Pestilence, in 1347. This was the period of Italian glory in literature and art, and in political importance. *Giovanni Villani*, one of the most elegant and faithful of her historians, was one of the Pest's victims. *Giovanni Boccaccio*, however, another of the luminaries of Italian literature, survived to adorn the subsequent pages of her history, and the Pestilence in question appears to have led to the production of the deservedly celebrated Ten Days Tales [Il Decamerone], the introduction to which, as versified by an English Translator, is so confirmatory of the consternation of the period that, although in verse. I shall venture to introduce an extract therefrom:—

"This Preface to remembrance calls
A Plague of such forlorn career,
That yet the soundest mind appals,
The dreadful narrative to hear.
* * * * * * * * *
Know then, my gentle readers fair,
A Plague broke out in Florence gay,
Which neither age nor sex did spare,
And swept off hundreds every day.

No human skill neglected was
Its dreadful progress to restrain,
But, from an unknown heavenly cause,
All earthly efforts proved in vain.

No language can the misery paint,
No artist's pencil has the power,
For words and colours are too faint
To represent each shocking hour.

Suffice it then that I should say,
God, doubtless for some dreadful crime,
One hundred thousand swept away
In little more than three months' time.

* * * * * * * *

What troops of youths of noble line,
What groups of virgins full in bloom,
Here healthful with their parents dine,
And sup with friends beneath the tomb.

Weary am I of this sad theme,
No more on wretchedness I'll dwell,
It now appears a frightful dream
Work'd up by some damn'd fiend of Hell.

One Sunday evening, as I've heard,
The virgin's bell began to toll,
Miraculous, as then appeared
Within its aisle no living soul.

31. The biographers of Boccaccio, *Filippo, di Matteo Villani*, observe that "Just before Boccaccio wrote, the Plague at Florence had totally changed the manners and customs of the people; only a few of the women had survived this fatal malady, who, having lost their husbands, parents, or friends, gradually grew regardless of those constraints, and customary formalities, which, of course, before influenced their behaviour. For want of female attendants they were obliged often to take men only into their service, and this circumstance greatly contributed to destroy their habits of delicacy, and gave an opening to various freedoms unsuitable to the sex, and frequently productive of very serious consequences. As to the monasteries, it is not surprising that Boccaccio should have made them the scenes of his most libertine stories. The Plague had thrown open their gates. The Monks and Nuns wandered abroad, and, partaking of the common liberties of life, and the levities of the world, forgot the rigour of their institution and the severity of their ecclesiastical character. At the ceasing of the Plague, when the religious were compelled to return to the cloisters, they could not forsake their attachment to those secular indulgencies; they continued to practise the same free course of life, and would not submit to the disagreeable and unsocial injunctions of their respective orders. Contemporary historians give a striking representation of the unbounded debaucheries of the Florentines on this occasion; and ecclesiastical writers mention this period as the grand epoch of the relaxation of monastic discipline."

32. A remarkable circumstance, in relation to the ravages of this eventful period, is the silence of the French and English historians respecting it. In between seventy and eighty printed works, and tracts, under the head *Pestus*, in the library of the British Museum, only one slight reference is made to it, except in a little tract, entitled *Flagellum Dei*, which is hereafter inserted. Mr. Johne's edition of *Sir John Froissart's Chronicles*, printed at his seat at Hafod in Wales in 1803—10, contains the following chapter.

"This Year of our Lord, 1349, there came from Germany persons who performed public penitences by whipping themselves with scourges having iron hooks, so that their backs and shoulders were torn; they chanted also, in a piteous manner, canticles of the nativity and sufferings of our Saviour, and could not by their rules remain in any town more than one night; they travelled in companies of more or less in number, and thus journeyed through the country, performing their penitence for thirty-three days, being the number of years Jesus Christ remained on earth, and then returned to their own houses. These penitences were thus performed, to intreat the Lord to restrain his anger, and withhold his vengeance; *for, at this period, an epidemic malady ravaged the earth, and destroyed a third part of its inhabitants.* They were chiefly done in those countries the most afflicted, whither scarcely any could travel; but were not long continued, as the church set itself against them. None of these companies entered France, for the King had strictly forbidden them, by desire of the Pope, who disapproved of such measures, by sound and sensible reasons, but which I shall pass over. All clerks, or persons holding livings, that countenanced them, were excommunicated, and several were forced to go to Rome to purge themselves. About this time, the Jews throughout the World were arrested and burnt, and their fortunes seized by those lords under whose jurisdictions they had lived, except at Avignon, and the territories of the church dependent on the Pope. Each poor Jew, when he was able to hide himself, and arrive in that country, esteemed himself safe. It was prophesied that, for one

hundred years, people were to come with iron scourges, to destroy them; and this would now have been the case, had not these penitents been checked in their mad career, as has been related."

33. *On this chapter Mr. Johnes observes,* "Here endeth the additions. I cannot help supposing there must have been more, for Froissart would certainly have particularly mentioned this sad calamity of the plague, that afflicted all Europe, and he scarcely notices it.

"It began," says Mr. Johnes, "in the spring of the year 1348, and came from Asia. It destroyed in some parts the fourth, in others the third of their population; sometimes it left not the tenth part. It carried off in Paris from 40 to 50,000, and in the little town of St. Denis 1600. There were sometimes, at Paris, 800 Burials in a day; and in the single church-yard of the Charter House, London, were buried 200 daily. It broke every bond of attachment asunder; servants fled from their masters, wives from their husbands, and children from their parents. There were no laws in force: the greatest excesses were committed, and when the contagion was at an end the morals were found corrupted."

Lord Hailes dates its ravages in 1349, and says, "The great Pestilence which had long desolated the Continent reached Scotland. The historians of all countries speak with horror of this pestilence. It took a wider range, and proved more destructive, than any calamity of that nature known in the annals of mankind."

34. *Holinshed, in his Chronicles,* after treating of the Peace between England and France effected by the intervention of Pope Clement VI., which followed the battle of Cressy and the surrender of Calais to the English in 1347—8, has the following passage, *viz.* "But, now that there was a peace thus concluded betwixt the two kings, it seemed to the English people that the sun brake forth after a long cloudie season, by reason both of the great plentie of all things, and remembrance of the late glorious victories; for there were few women that were housekeepers within this land but that they had some furniture of household that had been brought to them out of France as part of the spoile got in Caen, Calis, Carenton, or some other good towne. And, beside household stuffe, the English maides and matrones were bedecked and trimmed up in French women's jewels and apparrell, so that as the French women lamented for the losse of those things, so our women rejoiced of the gaine. In this twenty-second Yeare [Edw. III., 1348] from Midsummer to Christmasse, for the more part it continually rained, so that there was not one day and night drie together, by reason whereof great flouds insued and the ground therewith was sore corrupted, and manie inconveniences insued, as great sicknes, and other, in so much that in the year following, in France, the people died wonderfullie in diverse places. In Italie also, and in manie other countries, as well in the lands of the infidels as in Christendome, this grievous mortalitie reigned to the great destruction of the people. About the end of August, the like death began in diverse places of England, and especially in London, continuing so for the space of twelve months following. And upon that insued great barrennesse, as well of the sea as the land, neither of them yielding such plentie of things as before they had done. Whereupon vittels and corne became scant and hard to come by.

"Anno Reg. 24. About the end of August the Death in London ceased, which had bin so great and vehement within that citie, that over and beside the bodies buried in other accustomed burieing places, which for their infinite number cannot be reduced into account, there were buried that year dailie, from *Candlemasse till Easter,* in the Charterhouse yard of London, more than two hundred dead corpses."

35. Mr. Johne's Account, in Section 31, of the Number reported to have died in St. Denis, will be seen to differ greatly from the number stated in Section 26: the greater number is, probably, the more correct; for, although Mr. Johnes calls it the little town of St. Denis; when reflecting on its richly endowed abbey of Benedictines, founded in the ninth century, and looking now at its magnificent Cathedral, and remains of other splendid edifices, it is impossible not to suppose but that it must, in past times, have been a place of far greater population and importance than at present; a discrepancy

also appears in regard to the number reported to have died in Norwich, the 57,343 stated in Section 26, to have died in that city, are in the same Section stated by another Historian to have been the number that died in London. Norwich, as well as St. Denis, in the fourteenth century, appears to have been a place of far greater importance than subsequently, and the 57,343 deaths in question, when assigned to Norwich, are more likely to be correct than when assigned to London. The Accounts relating to the extent of the mortality in London, at this period [1348], are so very contradictory as to render a just conclusion on the subject difficult to be arrived at. In addition to the contrariety exhibited in the note to Section 26, page ix., in which *Rapin* states in round numbers that about 50,000 persons were buried in a churchyard belonging to the Cistercians, Mr. Johnes, the Annotator of Sir John Froissart's Chronicles, see Section 33, states that, "in the single church-yard of the Charter House, London, were bnried 200 daily;" and *Holinshed*, who was probably Mr. Johnes's authority, states (see Section 34) "that over and beside the bodies buried in other accustomed burieing-places which for their infinite number cannot be reduced into account, there were buried that year dailie, from *Candlemasse till Easter*, in the Charter House Yard of London, more than 200 dead corpses." Now, as in no year, would Candlemasse till Easter embrace a period of more than 80 days, 200 daily during such period gives only a total of 16,000 instead of above 50,000, as stated by *Rapin*. The several accounts, also, all appear at variance with the fact of the case, in regard to the burying ground in question as then belonging to the *Cistercians*, see note to Section 27. Such contradictions are a disgrace to History; and they are pointed out here to afford an opportunity of repeating the hope expressed in Section 2, "that measures will be immediately adopted for obtaining the most accurate Weekly Returns of the Diseases and Mortality of the whole of this, now vast, Metropolis; Mr. RICKMAN, the Assistant Clerk of the House of Commons, whose diligence, taste, and perspicuity of arrangement in all that appertains to the highly important and onerous situation which he fills with so much honor to himself and advantage to the country, in the Introduction to an Abstract of the Population Returns of 1831, states in Section 5, page 11, that "London used always to suffer heavily from the Plague, and in the great Pestilence which, originating in the East, in 1345, reached England in 1348, it seems well established that 100,000 persons died, and were buried in the City."

36. Whatever credit may be due to Mr. Rickman for his general accuracy, and the general soundness of his conclusions and inferences, it will be seen that in this instance he is not borne out by any of the other authorities here introduced, and, in the absence of all satisfactory information in regard to the extent of the Population of London at that time, it seems difficult to draw any thing like a certain conclusion in regard to the extent of the ravages which the Pestilence then occasioned. In addition to the plague of 1348—9, *Holinshed* states that, in Anno Reg. 19. Edw. IV. [1479] "There was great mortality and death by the Pestilence, not onlie in London, but in diverse parts of the realme, which began in the latter end of September, in the year last before passed, and continued all the year till the beginning of November, which was about fourteen months; in the which space died innumerable of people in the said citie and elsewhere." And again, in 14, 15, Hen. VII. 1499; "The next yeare after there was a great Plague whereof men died in many places, verie sore; but specialle, and most of all, in the citie of London, where died in that year thirtie thousand."

37. The Tract adverted to, in Section 32, entitled *Flagellum Dei* [Scourge of God] being a collection of the several Fires, Plagues, Pestilential Diseases, &c., that had happened, in London especially, and other parts of this Kingdom, from the Norman Conquest, relates as follows, viz.

"20. WM. the CONQ. A great fire from West to East, after which great mortality ensued.
WM. RUFUS. 600 houses destroyed by a tempest.
RICHARD I. Malling in Kent destroyed by Fire, followed by Mortality so great that the living hardly sufficed to bury the dead.
HEN. III. 20,000 people died in London for want of food.

The *Chronicon Preciosum* states that, in 1270, [54 Hen. III.] wheat was so dear that it was sold at £4. 16. 0 the quarter, and sometimes at 16s. the bushel, which makes it at £6. 8. 0., but no cause is assigned for this inordinate price, which may be considered as equal to £40 per quarter, in the present day [1832].

The next great event is the Plague of 1348—9; and thirteen Years after another great mortality is mentioned, of which the nobility suffered greatly.

3. Rich. II. [1379] Mortality so great in the North that the Country became almost desolate.

17—19. Edw. IV. [1478—81] innumerable people died. See *Holinshed* as quoted in Section 34.

Hen. VII. Sweating sickness.

15.	do.	1500.	30,000 died of the Plague in London. See *Holinshed* as above.
22.	do.	1507.	Norwich nearly consumed by Fire.
9.	Hen. VIII.	1518.	Sweating Sickness, which carried off infinite multitudes of nobility, and others
13.	do. do.	1522.	Great Mortality.
20.	do. do.	1529.	Sweating Sickness over the whole realm.
33.	do. do.	1542.	Hot Agues and Fluxes.
33.	do. do.	1545.	Great Plague.
5.	Edw. VI.	1552.	Sweating Sickness very general.
4.	Mary	1557.	Hot burning Agues, &c. Seven aldermen in London died.
5.	do.	1558.	Great Mortality in Harvest.
6.	Eliz.	1563.	Plague, of which 21,500 died in London.
36.	do.	1593.	do. do. 17,890 died, including the Lord Mayor and three Aldn.
1.	James.	1603.	do. do. 30,578.

38. The numbers that died weekly during the two last enumerated periods are exhibited at pages 65—8, from which date the detailed display of the Diseases and Mortality of the Metropolis in the present Work commences; since when numerous treatises, both in France and England, have appeared, endeavouring to show the cause and nature of Pestilential Diseases, and offering innumerable remedies for their prevention and cure; they are, however, all equally deficient in facts, and equally vague and unsatisfactory in their attempts at reasoning—all alike appear to have overlooked the basis upon which all physical investigations should be founded, viz., a simple record of facts—the past and still prevailing aversion to which in physical and social inquiries is a feature of the times as remarkable as it is to be lamented for the consequences which it involves. It is also as much a matter of surprise as of regret that while the mechanical arts, and some of the abstract sciences, have been carried to a degree of perfection which bespeaks an unlimited capability in man, in all that relates to his animal and social economy, as well as agriculture, as far as any chemical, or strictly scientific, or philosophical appliances are concerned, the greatest uncertainty still prevails, and, consequently, they remain exposed to a constant conflict of opinion and conceit. The elementary principles of nature are simple and determinate; men, in common with all other animals, subsist by a reciprocal interchange with the vegetable part of the creation, of the opposite gases which they respectively absorb and exhale: what is food to one is poison to the other, and *vice versa*. The Atmosphere is the common depository for the reception and supply of both; while the well-being of the whole depend, not on the existence of the means of subsistence, *per se*, but simply on their *due proportion* to each other. If, therefore, the Atmosphere abounds in any particular locality with an *undue* preponderance of either hydrogen or oxygen, or venomous animalculæ which the decomposition of vegetable matter engenders, animals and Vegetables must respectively and necessarily alike be subject to derangement.

39. The first duty of man, therefore, obviously is, where circumstances enable him to do it, to weigh and ascertain carefully the state and condition of the atmosphere, and register correctly the effects which it produces under each, and all, of its ever varying degrees of combination, as the best means of forming a basis on which to found all social as well as physical enquiry. The pliable and reasoning faculties of man fit him pre-eminently for such investigations, and render his indifference to them a culpable sin of omission, and palpable dereliction of duty.

The delight and gratification, also, which a digest of a well arranged registry of the effects simultaneously produced in different localities by atmospheric causes is calculated to afford, and the benefits which it would doubtless offer to man, render the absence of a well organised and all efficient Meteorological Association another of those subjects which are as much a matter of surprise as regret; and it is hoped that the omission being now pointed out it will no longer remain a libel on the discernment and assiduity of Englishmen. The time is favorable for exciting the phlegmatic tendency of their nature; and, as no subject to which the mind of man can be directed is more universal in its character, there is none better calculated to rend asunder the chains which have heretofore bound men to local prejudices, militating as much against their individual advantage as against that of each other.

40. There are no effects without causes. However subtle the cause may have been which occasioned such direful effects as the preceding pages relate, and however inexplicable the nature and effects of some now prevailing diseases may seem, supposing even that the nicest and most diligent attention which can be bestowed on the state and effects of the Atmosphere should not afford all the satisfaction which may be wished or desired, there can be no doubt but that it would develope much in the highest degree interesting and important to man, and certainly contribute more towards developing the cause of all physical diseases than ten thousand times ten thousand speculations, however ingenious the hypothesis and however logically sustained.

41. A high degree of heat as a *disinfecting* power has recently been much expatiated on as a new and important discovery. The hypothesis is reasonable, its importance good for all it is worth, but its originality very questionable. The destruction of the greater part of London by fire, the Year following the great Pestilence in 1665, doubtless did much to prevent a recurrence of so virulent a disease; and it is stated that during the raging of the Plague at Avignon, in 1347, Pope Clement VI. kept up great fires by night as well as by day in every room of his palace, and that the Disease was unknown within its walls. Importance has also been attached to a recent assertion that the Spasmodic Disease which at present occasions so much excitement has diminished where it had hitherto prevailed with the approach of spring and summer heat: it may have been so—and the Disease may probably arise from causes totally different from those which engendered virulent distempers at all former periods; but it is a fact not undeserving of notice that in all the Years of Pestilence in London, from 1593 to 1665, inclusive, the virulence of the Disease uniformly increased with the advance of summer, and decreased only with its departure.—See page 69.

42. On taking a retrospective view of the several accounts heretofore exhibited in evidence of the desolating effects of the Pestilence of 1345—62, no one certain conclusion can be drawn either in respect to its cause, or means of cure; the same uncertainty appears also to have prevailed during the prevalence of Pestilence in England, from 1593 to 1665; in the latter Year it is stated that "the practitioners in physic stood amazed to meet with so many various symptoms, which they found among their patients who were ill of the Plague. One week the general distempers were blotches and boils, the next week as clear skinned as may be, but death spared neither, one week full of spots and tokens, and perhaps the succeeding week none at all." The remedies proposed at this period were innumerable, and as various as numerous. The Queens, Mary and Elizabeth, and their Majesties, James and Charles, all contributed their nostrums; theirs, as well as many others, were amusing and palatable, but all were eclipsed by the recipe of Lord Bacon, which was, "Take a pint of Malmsey wine burnt, with a spoonful

of bruised grains, i. e. cardamom seeds, of the best treacle a spoonful, and give the patient to drink of it two or three spoonfuls pretty often, with a draught of Malmsey wine after it, and so let him sweat, if it agree with him, and it stay with him, he is out of danger; if he vomit it up repeat it again;" and another, as characteristic of the temper and tone of the period, I hope to be pardoned for inserting.—In 1603 it is stated that "a citizen was *whipped* for venturing to appear at Court from a district in which Pestilence was raging."

42. Milan, in 1575, Marseilles, with its neighbouring cities Aix, Arles, &c., in 1720, and Messina in 1745, all suffered severely by Pestilence; but the accounts which have been published of the ravages of the Disease at each place are equally inconclusive with all that preceded them in regard to the cause that produced it, and the means of its prevention and cure. In short, down to the present day [March 1, 1832] the only safe conclusion that can be arrived at is, that Nature, in reference to certain maladies, has hitherto baffled all the efforts of man to discover their cause. What has happened once may happen again; so that there is as much reprehension due to the indulgence of an over sanguine confidence in the efficacy of medical skill and energy, and eleemosynary aid, in preventing or allaying the threatened prevalence of Spasmodic disease, as there is in implicitly yielding to fearful anticipations of its direful consequences. The Austrian government have published a seemingly circumstantial account of the extent of the ravages of Spasmodic Cholera in 1831, in the metropolitan city of Vienna, and the Austro-Polish province of Galicia. In the former in 18 Weeks 411 Deaths occurred out of 690 cases within the city, and 1547 out of 3000 attacked in the suburbs. In Galicia 97,770 are reported to have died out of 260,944 attacked: but all this, it will be seen, proves nothing useful: numbers are interesting only in reference to relation and proportion—and, for the above information to have been either useful or interesting, the whole population, and the average rate of current mortality of the respective places, should have been given; then it would have shown how far the spasmodic disease in question had been an increase of malady, or how far it had only superseded other diseases. In like manner all the reports that have been published in England in reference to the fatal effects of *Spasmi* are unsatisfactory.

44. A distinguished speculatist has advanced the hypothesis "That, however much medical skill and energy may alter the form and pressure of Disease, Death will have its quota; that the stream of Mortality is uniform, and that the Totality will always prove pretty much the same. The Statistical Display of the Diseases and Mortality of the Metropolis herewith exhibited seems to support this hypothesis; and should it prove true, on a more diligent and minute investigation, the introduction of new forms of Disease will at all times be liable to less fearful apprehensions than under the absence of correct information on the subject. On this ground it has been that I have ventured to submit to legislative, executive, and professional attention, and the prevailing acumen and intelligence of the age, the facts and suggestions which the accompanying pages contain, in the hope that, whatever imperfections and faults may be detected, I shall escape the charge of presumption, inasmuch as I imposed upon myself the task under the fond expectation that, if I failed in establishing any new principles, the large mass of facts which I proposed to myself to collate, and have now brought into a focus, would suffice to enable future inquirers to arrive at just conclusions, and develope causes which shall lead to the adoption of measures to promote alike the physical, the social, and the moral improvement of my species.

London, March 1, 1832. J. MARSHALL.

Table of Statistical Contents.

PAGE 1 exhibits the Annual Value of Real Property as assessed to the Property Tax in 1815, and the Total Number of Persons in each of the 97 Parishes within the Walls of the City of London at each of the four Ten-Yearly Periods, 1801, 1811, 1821, and 1831—the Parishes arranged according to their locality and relation to each other, in five Divisions, for the purpose of showing the Advantages and Economy that would arise from forming so many small Parishes into Five Parochial Districts.—See Note to Contents of Pages 6, 7.

PAGE 2 exhibits the Number of *Inhabited Houses, Families,* and Persons, in each of the Metropolitan Parishes within the Bills of Mortality, as returned to Parliament, at each of the three Ten-Yearly Periods, 1801, 1811, and 1821; showing the proportion of Males and Females in each Parish at the latter Period, and also the Annual Value of Real Property in each, as assessed to the Property Tax in 1815—the Parishes, as before, arranged Topographically, or in reference to their locality and relation to each other, except No. 36, which should properly have been placed next to the out part of the Parish of St. Botolph without Aldgate, No. 48, which is commonly called *East Smithfield Liberty,* with which Liberty *Glass House Yard* is united in its Parochial Assessments. Nos. 2, 4, 5, 23, 24, and 32, are Extra Parochial Districts making no return of Parochial Rates.

*** For the Population of each of the Parishes, Precincts, and Places in this Page in 1831, up to No. 60 inclusive, see Page 45; and for the 10 Parishes in Surrey see Page 47.

PAGE 3 exhibits the Number of Inhabited Houses, Families, and Persons, in each of the remaining Parishes in the County of Middlesex, and in Becontree Hundred, Essex, as returned to Parliament at each of the three Ten-Yearly Periods, 1801, 1811, and 1821; showing, as in the preceding Page, the proportion of Males and Females in each Parish in the latter Period, and the Annual Value of Real Property as assessed to the Property Tax in 1815—the Parishes arranged according to their locality and relation to each other.

*** For the Population in 1831 of Nos. 71—75 see Page 45; and of 76—135 see Page 55.

PAGES 4, 5, exhibit the Number of Inhabited Houses in 1801 and 1821, and the Number Empty or Uninhabited in the latter Year, in each of the 97 Parishes within the Walls of the City of London; and also the Number of Persons reported to have died of the *Plague* in each Parish in the Year 1665, together with the Amount of the Parochial Assessments in each Parish at different Periods, from 1776 to 1815.

*** See Notes to these Pages for the cause of Decrease of Inhabitants within the Walls of the City of London; and for the Excess of Parochial Assessments, as compared with every other District in the Kingdom, see Details of the Assessments in the two following Pages.

PAGES 6, 7, exhibit the 97 Parishes within the Walls of the City of London, arranged in Alphabetical Order, with Number of reference to their local position, as exhibited in Pages 1, 4—5, and 8—9, and show the Number of Persons, under seven different heads, that received Parochial Relief in each Parish in each of the Years ending Easter 1803 and 1813, and the Amount expended for their Relief, as well as for other Parochial Purposes; and also the Total Number of Families

in each Parish in 1801 and 1811, for the purpose of comparison with the Numbers relieved in 1803 and 1813; and, in addition to the Amount expended for the Maintenance of the Poor in each Parish in those Years, there is also exhibited the Amount expended for the like Purposes in each of the Years ending Easter 1820, 1825, and 1829; and the Amount of Charitable Bequests at the disposal of the Parochial Officers in each Parish.

*** *For a Comparative View of the Parochial Expenditure of the* 97 *Parishes within the Walls of the City of London, with the like Expenditure in* 20 *of the principal Towns of the Kingdom, see Pages* 14, 15.

PAGE 8 exhibits the local Position of 61 Parochial Churches within the Walls of the City, as rebuilt, or as they were left after the great Fire in 1666, showing the Cost at which 45 were rebuilt; the rated or estimated Annual Value of each Benefice, and in whom the Presentation thereto is vested; and also an Account of the Time and Cost of rebuilding the Cathedral Church of *St. Paul.*

PAGE 9 exhibits the Rated or Estimated Annual Value of 54 other Parochial Benefices within the Bills of Mortality, showing the Date when several of the Churches were built, and distinguishing all those deserving attention for their Architectural Features; and also the estimated Amount of Rateable and Rated Property in each Parish, as returned to a Committee of Parliament on the Police of the Metropolis in 1828. An amended Account of this Return was made in 1831, see Pages 45 and 55.

*** *The extensive Impropriation of Brazennose College, Oxford, as exhibited opposite Nos.* 97—103 *in this Page, deserves attention.* Brazennose has long had the reputation of being the most aristocratic and consequential of all the Oxford Colleges.

PAGE 10 exhibits the Rated Annual Value of 50 other Parochial Benefices and Chapelries in the Counties of Middlesex, Surrey, Kent, and Essex, within the limits of the METROPOLITAN POLICE, showing in whom the Presentation to each Benefice is vested; and, as in the preceding Page, the Estimated Amount of Rateable and Rated Property in each Parish, as returned to a Committee of Parliament on the Police of the Metropolis in 1829; and also the Number of Members in Friendly Societies in 1802 and 1815, and the Amount of Charitable Bequests at the disposal of the Parochial Officers in each Parish.

PAGES 11, 12, exhibit a like Account to the preceding of all the remaining Parishes in the County of Middlesex, distinguishing those without, from those within, the limits of the Metropolitan Police, and in addition to what is exhibited on the preceding Page, the Rental of each Parish as returned to a Committee of Parliament on SELECT VESTRIES in 1830.

*** *For the amended Return of Rateable Property to Police Committee,—see Page* 55.

☞ The conclusion of Page 12 also exhibits the Total Population of each great district of the Metropolis at five different Periods since 1700. This Statement, and the Note which follows, will be found to deserve more than ordinary attention, as well for its own sake as in relation to the Number of Burials as exhibited at Pages 62—63, and 72—81; see also Sections 11, 12, of Introduction.

PAGE 13 exhibits the Proportion which the Amount expended for the Maintenance of the Poor in the County of Middlesex bears to the Proportion expended for the like Purpose in all England and Wales, in each of a Series of Years since 1750; the Number of Committals for Crime in the County of Middlesex in each of the 18 Years 1812—30; the Annual Average Price of Wheat in each Year since 1750, and the Money amount expended for the Maintenance of the Poor converted into Quarters of Wheat; the Annual Supply of Oats, Peas and Beans, and Malt and Flour, brought to Mark Lane Market in each of the 19 Years 1812—1831, with a Summary View of the Amount of the Parochial Expenditure and Number of Persons relieved

out of the Poor's Rate, in the County of Middlesex and City of London, in each of the Years ending Easter 1803, 1813, 1814, and 1815.

*** The Note at the foot of this Page is particularly deserving of notice.

PAGES 14, 15, exhibit the Amount expended annually for the Maintenance of the Poor in each of the great Metropolitan Parishes and Districts, as well in the Counties of Surrey, Kent, and Essex, as in those in the County of Middlesex, in the Years ending Easter 1776, 1785, and 1803, and in each of the 17 consecutive Years ending the 25th March, 1829, exhibited in comparison with the Amount expended for the like Purpose in the 15 Principal Towns of England, showing also the Annual Value of Real Property as assessed to the Property Tax in 1815, and the Total Population as returned to Parliament at each of the four Ten-yearly Periods 1801, 1811, 1821, and 1831, in each Parish.

*** The Notes at foot of Page 14, and head of Page 15, deserve attention; they render unnecessary any further observation here.

☞ See another Comparative View of Parochial Expenditure at the back of the last folding sheet of the Display of Diseases.

PAGES 16, 17, exhibit the Number of Houses assessed to the House and Window Duty in each District of the Metropolis, in the Counties of Surrey, Kent, and Essex, as well as in Middlesex, compared with the Number assessed in four other Counties, and in all England and Wales in the Year ending the 5th of April, 1830, according to a Return presented to Parliament in the Session of 1831. See Parliamentary Papers, Nos. 123 and 124 of that Session. The Houses are exhibited in 16 Classes, and the Windows in 10. The Number and Rental of each Class assessed to the House Tax is shown, and the Totals exhibited in comparison with the Number assessed in 1822.

*** The Notes at the head of these two Pages deserve attention.

PAGE 18 exhibits the Annual Value of Income and Property assessed to the Income and Property Taxes, in the Metropolis, at different Periods, from 1801 to 1815, and a Summary View of the Extent of the Local and Direct Taxation therein in 1827, compared with the Total Amount in all England and Wales, and showing the various Kinds of Property upon which the Taxes were levied.

*** The most interesting feature of this Page is that which shows in 17 Classes the Income derived in Profits on Trades and Professions in 1815 (Schedule D), and the large Proportion which the Metropolis derived in comparison with the Amount in all Great Britain: see Note to Contents of Page 42.

PAGE 19 contains an Account of Money raised on Annuities, granted by the Parish of St. Luke (see No. 38, Page 2, and 91, Page 9). The Statement formed part of a Report on the General State of the Finances of the Parish made to the Parishioners by the Vestry Clerk on the 21st October, 1828, and, in reference to this particular Account, the Report states that it exhibits "an unparalleled Instance of the most abandoned Venality and Jobbing:" in addition to the Injury which the Parishioners appear to have sustained by the transactions which this Account exhibits, other Accounts which accompany it represent Defalcations by Embezzlement and otherways to the Amount of £5,698, during the Period 1810—1826.

PAGE 20 exhibits the Counties of England and Wales arranged in order of their Total Population in 1801, showing the Population, and the Proportion of Males and Females in each County, as returned to Parliament in that Year, and then the Number of Marriages, Baptisms, and Burials, unentered as well as registered, in each County in the 10 Years 1801—1810, distinguishing the Proportion of Males and Females both Baptized and Buried. The opposite Page (21) then shows the Ratio of Marriages in the 10 Years to every 100 of the Total Population in 1801,

and the Ratio of Baptisms and Burials to every Marriage; the Total Increase of Population in each County in the 10 Years 1801—1810; the Excess in each County of the Baptisms over the Burials in the same 10 Years; and the Counties in which the Total Increase in the 10 Years exceeds the Excess of Baptisms over Burials; and, *vice versa*, the Counties in which the Excess of Baptisms over Burials exceeds the Total Increase; or, in other words, the Counties whence Numbers have emigrated, and those into which Numbers have immigrated.

PAGES 22, 23, exhibit the Counties of England and Wales arranged in order of their Total Population in 1811, showing the Population, and the Proportion of Males and Females in each County, in that Year, with the Number of Marriages, Baptisms, and Burials, Ratios of ditto, &c. &c., in the 10 Years 1811—1820, in the same order as in the two preceding Pages from 1801—1810.

*** In the former of these two Periods the Increase of Females exceeds that of the Males, and in the latter Period the converse; this Difference may be accounted for in part from the large Number of Seamen and Soldiers discharged and distributed over every part of the Country between 1811 and 1820; while in the former Period drains on the Male Population were constantly being made. According to the Enumeration Returns in 1801 and 1821, the Total Increase of Population in all England and Wales, in those 20 Years, exceeded by 931,267 the Excess of Baptisms over Burials; from this result, supposing the Enumerations to have been correctly made, one of two things is certain, either that the Immigrations into must have exceeded the Emigrations from England and Wales, or that the Births must have exceeded the Deaths to that extent beyond the Number returned; but the probability is, that the Enumerations have not in any instance in the aggregate been accurate. Amidst such migration and uncertainty, it will be seen how difficult it is, as expressed in Page 12 of Introduction, to arrive at any satisfactory conclusion in regard to the exact Proportion which the Dead bear to the Living.

PAGES 24, 25, exhibit the Counties of England and Wales arranged in order of their Total Population in 1821; the Population of each County, as returned to Parliament at each of the Three Periods 1801, 1811, and 1821; the Total number of Marriages, Baptisms, and Burials, in each of the 10 Years ending with 1790, 1800, 1810, and 1820; the Ratio of Marriages to every 1000 of the Population, and of Baptisms and Burials to every 100 Marriages in each County in each of the Four before-mentioned ten-yearly Periods.

*** These two Pages will be seen to deserve particular attention, but the Note at the head of Page 25 renders unnecessary any further Observation here.

PAGE 26 exhibits the Counties of England and Wales arranged in order of their Total Population in 1821, and the Total Population of each County at each of the Five Periods 1700, 1750, 1801, 1811, and 1821; the Ratio of Increase per Cent. in each County between 1700 and 1821; the Total number of Baptisms and of Burials, and the Excess of Baptisms over Burials in each County in the aggregate of the 40 Years 1781—1820.

PAGE 27 shows the Total Number of Baptisms and Burials in each County of England and Wales in each of the Seven Years 1798—1804.

PAGES 28, 29, exhibit the Counties of England and Wales, again arranged in order of their Total Population in 1821, with the Number of Baptisms and Burials in each County in 14 different Years from 1700 to 1820. The Notes at the head of these and the preceding Page show why the Years therein exhibited were selected for exhibition.

*** The Counties being arranged in order of their Total Population in 1821 enables the Disproportions of the Baptisms and Burials in the several Counties to be seen with great facility.

PAGES 30, 31, contain an Account of the Amount of Money expended for the Maintenance of the Poor in each County of England and Wales Annually, on an Average of Three Years ending Easter 1750; in the Year ending Easter 1776; Annually on an Average of the Three Years ending Easter 1785; in the Year ending Easter 1803; and in each of 18 Consecutive Years ending Easter, or the 25th March, 1830—the Accounts again arranged in order of their Total Population in 1821, by which Arrangement the Disproportions of Amount expended in the different Counties, and which will be seen to be very considerable, are readily discernible.

*** As the Amounts expended for the Maintenance of the Poor may fairly be supposed in some degree to be influenced by the Price of Subsistence, the Total Amount of the Parochial Assessments, and the Average Price of Wheat in each Year, are also exhibited; while Page 13 will show the Money Amount in each Year converted into Quarters of Wheat: the Average Prices of Wheat in the Two Statements will be seen not to correspond with each other. The Note at the head of Page 31 states the Authority from which that Statement was compiled; but, after my Statement had been printed off, there appeared a corresponding Account laid before Parliament on the 6th of December, 1830 (Paper No. 52 of that Date), differing only in regard to the Average Price of Wheat, which is as given, in the Statement herewith, at Page 13. The discrepancy probably arises from the Average at one Time having been taken from the 1st of January to the 31st of December, and at another Time from the 25th of March in one Year to the 25th of March in the next Year; and then by taking the Average for any one Year ending the 25th of March, say March 1814, and putting it down for the Year 1814; when after the 25th of March the Price might alter materially, either lower or higher, as was the case in that Year; it is sufficient to account for the Discrepancies which the two Accounts more particularly exhibit in regard to that Year; both Accounts will be found to differ from another Statement of Averages exhibited at Page 43, which, being made up uniform from the beginning to the end of each Year, is the most deserving of Notice for general reference.

PAGES 32, 33, show the Number of Committals for Crime in each County of England and Wales, in each of the 25 Years 1805—1829; the Counties again arranged in order of their Total Population in 1821, with the Population of each County in 1801 and 1821, and the Amount expended for the Maintenance of the Poor in 1803 and 1828, for the purpose of showing how considerably the Increase of Crime exceeds the Increase both of Population and Pauperism.

PAGES 34, 35, show the various Offences for which the Numbers in the Two preceding Pages were convicted in each of the 20 Years 1810—1829. Page 35 also shows the Annual Average Number of Capital Convictions and Executions in *London* and *Middlesex* during the 81 Years 1749—1829.

PAGE 36 shows the Total Population of each County of England at each of the Six Periods 1700, 1750, 1801, 1811, 1821, and 1831, with the Ratio of Increase per Cent. in each County, from 1801 to 1811, from 1811 to 1821, and from 1821 to 1831, and from 1700 to 1831—the Counties arranged in order of their greatest Ratio of Increase since 1700.

PAGE 37 shows the Proportion and Parts of Scotland engaged in Manufacturing distinct from the Agricultural and Highland Counties, with the Annual Value of Real Property in each Division.

*** This Page forms part of a Topographical and Statistical Display of Scotland, in royal 8vo., in which is exhibited the Locality and Relation to each other of every Parish in the Kingdom. The Superficies, Annual Value of Property as assessed to the Property Tax in 1815, and the Population of each Parish at each of the Six Periods 1755, 1790-8, 1801, 1811, 1821, and 1831, with a Variety of other Statistical Accounts, comprising

almost, if not entirely, every subject of interest to the Statesman and general Inquirer, in any way connected with the Extent, Resource, and Condition of Scotland; the Numbers in the Column of Towns and Counties refer to the Number of each respectively in the Topographical Arrangement.—*see announcements* herewith of Works now printing by Mr. Haddon.

PAGE 38 shows the Annual Value of Property assessed to the Property Tax under each of Five several Heads in each County of England and Wales, in the Year ending the 5th of April, 1804, and the Total Nett Proceeds of the Tax in each County, in each of the Years ending the 5th of April 1804, 1800, and 1813—the Counties arranged in the order of their Value of Property in 1802.

PAGE 39 shows the Superficies in Statute Acres deduced from the Trigonometrical Survey of each County of England and Wales; the Rentals of each, according to the Property Tax Returns of 1815; the Average Rate per Acre of the Total Superficies of each County; the Amount of Parochial Assessments for the Year ending the 25th of March, 1829; and the Amount of Contributions to the Land and Assessed Taxes in the Year 1829, in each County—the Counties arranged in order of their Total Superficies, whereby the Rental, Parochial Assessments, and Assessed Taxes, in Proportion to the Superficies, are rendered the more readily discernible.

PAGE 40 shows the Proportion of the Parochial Assessments in each County of England and Wales levied on Land, distinct from the Proportion levied on Houses,—Factories, Mills, &c.,—and Manorial Profits. This Page shows also the Amount expended in each County for County, Church, and Highway Expences, as well as for the Relief of the Poor, &c.

PAGE 41 contains a Summary View of the Population of Great Britain, showing the Proportion thereof dependent on each great Branch of Production and Occupation for Subsistence, as exhibited in detail, in a Topographical and Statistical Display of the Locality, Relation, Numbers, Resources, and Condition, of all the Towns and principal Parishes of England and Wales. The Reference to Pages 8—90, at the head of this Page, refer to the Pages of the Topographical Work just mentioned.—see announcement herewith of Works now printing by Mr. Haddon.

PAGE 42 shows the Number of Persons among whom £29,000,000 of Annual Income is divided. This is the Property assessed under Schedule C, as exhibited in Pages 18 and 42. It will be seen, by the Statement at Page 18, that in 1803 more than one-fourth of this Kind of Property was assessed in the Metropolis; and it is probable that an equal or even greater Proportion of the Amount at the present time is directly re-expended therein.

PAGE 43 was originally compiled as an accompaniment to a Proposal for publishing a Digest of all the Accounts and Papers relating to the Commerce and Finances of the Kingdom, presented to Parliament during the last 50 Years.—see announcements herewith of Works now printing by Mr. Haddon.

*** This, as well as the 23 preceding Pages, may, on a *prima facie* View of the Matter, be thought more applicable to a Work on the State and Circumstances of the Country generally than to one on the Metropolis exclusively; but when it is considered how singularly involved all the Relations of Great Britain are, and with what extraordinary Facility and Activity the Metropolis maintains Intercourse with every part of the Kingdom, it will be seen how difficult it is to convey an accurate Idea of the relative Results of the Metropolis with other Districts, without exhibiting it in conjunction with the Kingdom at large.

PAGES 44—55 exhibit the Amount of the Parochial Assessments, the Number of Persons under various heads who received Parochial Relief, the Amount expended for such Relief, as well as for all other Local or Parochial Purposes under various Heads, in each of a Series of Years

between 1775 and 1830, in each Parish of the Metropolis within the Bills of Mortality, as well as in every other of the Metropolitan Parishes within the limits of the Metropolitan Police. For the Population of these Parishes at each of the Four ten-yearly Periods 1801, 1811, 1821, and 1831, see Pages 45, 47, and 55; see also Notes at head of Pages 49 and 55.

PAGES 56—60 show the Population, &c., at different Periods, of each Province of Spain, Portugal, Holland, Belgium, Prussia, and Sweden.

*** These Statements all possess great interest; the Note at the head of Page 58, however, shows that while those relating to Holland and Belgium profess to have been arranged with the utmost possible regard to precision, they contain some Discrepancies fatal to their character for accuracy. The conclusion of Page 60 exhibits a Comparative View of the Ratio of the Population of Sweden and England in each of 13 Gradations of Ages, by which it will be seen that from the Age of 20 to 80 the Ratios preponderate greatly in favor of Sweden, while extreme Old Age, as well as Infancy and Youth, preponderate in England.

PAGE 61 shows the Total Number of Marriages, and of Baptisms and Burials, in all England and Wales annually, on an Average of Eight ten-yearly Periods, from 1700 to 1780, and annually in the 40 Years 1781—1820, distinguishing the Periods of unusual Increase or Decrease, and also the Proportion of Males and Females both Baptized and Buried.

PAGE 62 shows the Number of Marriages, Baptisms, and Burials, during the same Periods and Years, as in the preceding Statement, in each of the Five great Divisions of the Metropolis; while the corresponding Page, 63, shows the Total thereof: the Notes at the head of these respective Statements show the authority on which they are founded, and the Note at Page 61, in particular, shows how far they may be confided in for their accuracy.

PAGE 63 further shows, in *juxta position* with the Summary of the Five Divisions of the Metropolis, the Numbers, according to the Annual Bills of Mortality, in each of the 67 Years 1754—1820, with the Price of Bread in each Year.

PAGE 64 shows, for the same Periods and Years as exhibited in the Three preceding Pages, the Number of Marriages, Baptisms, and Burials, in the County of Lancaster, and West Riding of Yorkshire.

*** This Page deserves attention, not only as furnishing the means of Comparison with regard to the Results in the Two Districts, but also in reference to those exhibited in the preceding Pages.

PAGES 65—68 show the Extent of the Mortality of the Metropolis in all the Years of Pestilence between 1592 and 1666. Page 65 shows the Total Number of Burials Weekly in each of 20 Years between those Dates, Page 66 the Proportion reported to have died of the Plague, and Page 67, the Proportion reported to have died of Parish Infection, in each Week during the same 20 Years: Page 67 also exhibits a Summary View of the Total Number of Burials and Christenings in each of the 79 Years 1604—1682, distinguishing the Proportion of Burials in the City within the Walls, and in the City without the Walls, from the Proportion in the Out Parishes, and the Number reported to have died of the Plague in each Year. *The Diminution in the Number of Christenings from* 1642 *to* 1660 *deserves attention.* If during that Period there was no unusual Defect in the Returns, the Diminution is remarkable.

PAGE 68 shows the Total Number of Burials, and the Proportion reported to have died of the Plague in each Parish of the Metropolis, in each of the Four great Plague Years 1593, 1625, 1636, and 1665; the Parishes are arranged in order of their incorporation within the Bills of Mortality, with Numbers of Reference to their place in the Topographical Arrangement in Page 2.

PAGE 69 shows the Receipt and Disposal of Pauper Children into, and out of, the several Workhouses of the Metropolis in the Year 1828, with a Comparative View of the Totals in each of the Five Years 1798, 1801, 1810, 1822, and 1829. Column 11 of this Statement purports to show the Proportion of the Children born *Illegitimate*, which, supposing the Number to be accurate, bears a fair Proportion to the Number of Illegitimate Children born in Sweden as exhibited at Page 82; while in the Department of the Seine, in France, with less than 1,000,000 of Inhabitants, the Number of *Naissances naturel*, implying Illegitimate Births, is represented as exceeding 10,000 annually, indicating a great restraint of Sexual Intercourse in the British Metropolis as compared with that of France: but the Returns involve Fallacies both ways; in London all that are not specified as *Illegitimate* are received without Distinction in that respect, and therefore stand as Legitimate; while in France all Children received into the Hospitals are pronounced *naturel*. The reason of this is, that, as there is no Parochial Provision for Destitution, the State supplies the deficiency, and provides for Infancy, Infirmity, and Age, on an *adequate* and liberal Scale, and the Hospitals and Receptacles for Infancy bear an analogy to the *Foundling* Hospitals of London and Dublin, rather than to a Parish Workhouse; and, from the accredited care bestowed on the Inmates of the French Hospitals, all who are either destitute of natural affection for their offspring, or unable to provide them with sustenance, cause them to be received into the Hospitals; the term *Naissances naturel*, therefore, includes all Children abandoned and exposed, as well as illegitimate.

PAGES 70, 71, show the Number of Deaths within the Bills of Mortality in each of 13 gradations of Ages in each of the 103 Years 1728—1830.

However justifiable the charge of imperfection in the Returns may be, these two Pages bespeak a very marked change in the physical condition of the Metropolitan Population since 1740. The Number that died under 2 Years of Age in the 10 Years 1740—49 was as 34 to 29 in the 10 Years 1820—29; while of those from 2 to 29 the Number that died in the latter 10 Years exceeds the Number in the former by 1 in 17. From 20 to 50, the Numbers in 1740—49 were as 29 to 25 in 1820—29; and, of those 50 Years of Age and upwards, the Number in the 10 Years 1740—49, was as 28 to 22 in the 10 Years 1820—29. For the Proportion which the Total Number Buried bore to the Living at different Periods, &c.,—see Section 12 and 16 of Introduction.

PAGES 72—81 show the Number of Burials in each of the Metropolitan Parishes within the Bills of Mortality in each of the 174 Years 1657—1830: the first Two Pages embrace a Period of 72 Years, from 1657 to 1728, subsequent to which Date the Limits of the Bills of Mortality were considerably extended; from the latter Date also there is exhibited the Annual Average Prices of Wheat in each Year at Oxford and Eton, at each of which Places careful Records of Prices have been kept consequent on part of the College Lands being let at a Corn Rent. The Prices at Oxford were taken from a Work published in 1831, on the Supply, Abrasion, and Consumption of *the precious Metals* by MR. JACOB, the Comptroller of Corn Returns. The Prices for 1800 and 1801 are palpably erroneous: from the mode in which the Returns are exhibited in these Pages, the defaulting Parishes are easily discernible; the most recreant will be seen to be St. Ann, and St. George Westminster. St. Matthew, Bethnal Green, from 1779 to 1787; St. Luke, Middlesex, in 1823, 24; and St. Leonard, Shoreditch, in 1825, 26, bespeak culpability.

PAGE 82 shows the Total Population in each of the 24 Provinces of Sweden in 1820; the Number of Deaths under Six separate Heads, and of Diseases under Twelve Heads, in each Province, distinguishing under each Head the Proportion of Males and Females.

*** The Note at the head of this Page deserves attention.

STATEMENT of the Annual Value of Property, as assessed to the *Property Tax* in 1815; and *POPULATION*, as Returned to Parliament at each of the 4 Periods 1801 : 1811 : 1821 : and 1831 : in each of the 97 Parishes, within the Walls of the *City of London*; the Parishes arranged according to their locality, with an Alphabetical Index. *** *The improvements on the scite of Moorfields, will account for the increase of No.* 21, *and the demolition for the New Post Office and Hall of the Goldsmiths Company for the decrease in Nos.* 5, 8, *and* 9: *and for the approaches to the New London Bridge, for the decrease in Nos.* 83, 90, *and* 91.

	Fifty-seven PARISHES, West of the Mansion House and Royal Exchange — see Note on next Page.	Amount of Property assessed to Property Tax in 1815.	*Number of* PERSONS, *at each of the four Ten Yearly Periods.*			
		£	1801.	1811.	1821.	1831.

STATEMENT of the 97 Parishes, within the Walls, of the City of LONDON,— Continued from the preceding Page.

*** *The object of the arrangement of this Statement, into five Divisions, has been done in reference to the suggestion, of forming an union of the 97 Parishes, within the Walls of the City of London, into five Divisions, for Parochial purposes at least, if not for Ecclesiastical; The Statement of Parochial Expenditure, within the Walls, of the City of London, exhibits a vast excess over every other City or Town in the Kingdom, of the like, or relative extent of Numbers, which the minute subdivision of the City of London, in a great degree doubtless occasions; Bristol, Norwich, and other Cities, furnish precedents for the adoption of the suggestion here offered; the former of 20, and the latter of 43, have each been united into single Parishes.*

*** *In an Appendix to the enumeration Returns of the Population, presented to Parliament in* 1821; *Mr. Rickman, to whom the compilation of the Returns was assigned, represents the Population of the* CITY OF LONDON, *within the Walls, in* 1700, *at* 139,300; *at* 87,000, *in* 1750; *and* 78,000, *in* 1801; *but, on seeking for the cause of the great diminution in the* 10 *Years from* 1801 *to* 1811, *it proved that in* 1801 *the Precinct of White Friars, No.* 5; *St. Botolph, without Bishopsgate, No.* 11; *and Trinity, in the Minories, No.* 13; *containing together* 11,741 *Inhabitants, (see first Page of the Topographical Position, of the Metropolitan Parishes) were included in the City, within the Walls, and in* 1811, *and* 1821, *without the Walls. Although, the City, within the Walls, at the commencement, and middle of the preceding Century, doubtless contained a much greater Number of Inhabitants than at present; it is probably greatly overstated by Mr. Rickman, and indeed his own mode of putting the case, implies a doubt of its accuracy, which the above stated details in regard to* 1801, *seem to confirm; The Bank of England, and Mansion House; Blackfriars Bridge; and the East India House, and Warehouses, and other Public Buildings, have all, since* 1700, *occasioned considerable demolition; the two first, in the Parishes Nos.* 23 *to* 27; *Blackfriars Bridge, in Nos.* 30 *and* 31; *and the East India House and Warehouses, in No.* 79, *&c.; the chief cause, however of the diminution, may be assigned to the progressive tendency of inclination, on the part of the Inhabitants of the City, for Country residence, which all, whose means have admitted of it, have availed of; whereby, most of the Houses contiguous to the Exchange, Bank, East India House, and other Public Buildings, are merely used as Counting Houses, or places of Business during the day, without any Family Occupation. Since* 1801, *the New Post Office has displaced more than* 1,000 *Inhabitants, in Nos.* 5 *to* 9; *The Southwark Bridge, a considerable Number in Nos.* 38, 39, *and* 55; *and the New Palace of the Goldsmiths Company, contiguous to the New Post Office, in No.* 9, *and approaches to the New London Bridge, in Nos.* 72, 73, 90, *and* 91, *will cause still further considerable diminutions in* 1831; *Other Improvements also are contemplated, between St. Stephens Coleman Street, and Allhallows London Wall, Nos.* 21, *and* 29; *which when carried into effect, will displace a further very considerable Number of Inhabitants.*

STATEMENT of the 97 Parishes within the Walls of the *City of LONDON*, arranged in Alphabetical Order, with Number of reference to each Parish, in the Topographical and Ecclesiastical arrangements, shewing the Number of Persons in each Parish, who received *Parochial Relief* in each of the Years ending Easter 1803 and 1813; and the amount Expended for the Maintenance thereof, in each of those Years, and in the Years ending Easter 1820, 1825, and 1829; and also the Total Number of Families in each Parish, in 1801 and 1811; and the amount of Charitable Bequests at the disposal of the Parochial Officers, in each Parish.

97 *PARISHES within the Walls of the* CITY of LONDON, *in Alphabetical Order.*	*Number of reference to Topographical arrangement.*	*do. to Ecclesiastical arrangement.*	Number of PERSONS receiving Parochial Relief, in the Year ending Easter 1803.								*Total No. of Families in 1801.*	Amount of Parochial Expenditure, in the Year Ending Easter 1803.					*No. of PERSONS, receiving Parochial Relief, in the Year ending Easter 1813.*			*Total Number of FAMILIES, in 1811.*	*Amount Expended for Maintenance of the POOR, in each of the Years ending Easter*				Amount of Charitable Bequests annually at the disposal of the Parochial Officers.

STATEMENT shewing the Topographical Position of the 61 Church Benefices, within the limits formerly bounded by the Walls of the City of London, with the rated annual Value of each, &c. &c.

Of 97 Parish Churches within the Walls of the City of London, all except the 16 printed in Italics, as well as the Cathedral Church of St. Paul (see No. 2,) were destroyed by the Great Fire in 1666; forty-five printed in Small Capitals, were soon after rebuilt, the first Column of figures shewing the cost at which rebuilt. The Benefices of 36 other Parishes were united with 35 of those, the Churches of which were rebuilt, and the remaining ten Parishes have continued entire. The Statement below shews the whole 97 Parishes as constituted into 61 Benefices subsequent to the great Fire of 1666, with the rated annual Value of each under the Augmentation Act of 44 Geo. III, shewing also in whom the Presentation of each Benefice is vested; with the amount of the Estimates of the Annual Value of the real Property, as assessed to the Property Tax in the Year ending Easter 1815. The Cathedral Church of St. Paul, as well as that of St. Bride, Fleet Street (No. 63) were also entirely destroyed by the Great Fire in 1666; St. Brides was rebuilt at a cost of £ 11,430, its spire forming one of the distinguishing ornaments of the Metropolis: the rebuilding of St. Pauls, *commenced in 1710, and was completed under the entire Architectural superintendance of* Sir Christopher Wren *in 35 Years, at a cost of £ 747,954, including the Iron Balustrade with which it is surrounded: it is 500 feet from East to West; 250 feet in breadth; and 340 feet to the top of the cross with which its dome is surmounted.*

For the object of the arrangement below into five divisions, see Statement of the Population *of each of the 97 Parishes. The Church of St. Mary at Hill, No. 59, and St. Mary Woolnoth were greatly damaged by the Fire of 1666; that of St. Dunstan, No. 60, since 1818 was repaired at an expence exceeding £ 25,000.*

		Presentation of BENEFICE, *vested in* (*The Amounts in this Column denote the estimated annual Value of the Glebes and Tithes, belonging to the respective Benefices to which they are affixed.*)	*Cost at which Churches were Rebuilt.*	*Rated Annual Value of Benefice.*	*Amount of the Estimated Annual Value of the Real Property, assessed to Property Tax in 1815.*

STATEMENT of 54 *Ecclesiastical Benefices*, without the Walls of the City of LONDON; in the City of WESTMINSTER; and out Parishes of the Metropolis, within the Bills of Mortality.—*see the two following Pages for remainder of Metropolitan Benefices.*

The figures below, within the Parentheses, denote the date of erection or Rebuilding of the several CHURCHES; those noted with an* deserve attention for their Stateliness, or some Architectural features; those with a † for their deformity; and those with a ‡ for their antiquity, or for some Historical association: The old Church of St. Dunstan No. 62, was demolished in 1830, to widen and improve the great thoroughfare of Fleet Street. The figure preceding the C., as R. & 3 C. No. 84 &c. implies the Number of New Churches, as Chapels of ease to the Parent Church, which have been built in the respective Parishes, since 1820.

		PRESENTATION of BENEFICE *vested in* (The Church of *St. Katherine*, No. 105 belonged to an HOSPITAL of very ancient foundation, richly endowed: the whole, with about 1250 Houses were demolished in 1825-7, to make way for some New Docks. The Hospital & Church, with a Mansion for the Master have since been tastefully rebuilt, in the Regents Park, in the Parish of St. Mary-le-bone.)	*Amount at which rated in the Kings Books*	*Estimated annual Value of Benefice*	*Estimated Annual Value of Property as Assessed to the* PROPERTY TAX *in 1815*	*Estimated Amount of Rateable Property within each Parish, and the Amount at which rated, as returned to the Police Committe in 1828*

A new and extended Metropolitan Police Corps was established by Act of Parliament in 1829, having a similar Jurisdiction, but not included in the range of the Corps so formed,—see the two following Pages for the Metropolitan limits: and Page relating to Police, for the extent of the force, expences, and effects, of both Metropolitan and City.

* The rate and value of St. Paul, Covent Garden, No. 78, is obviously erroneously stated.

STATEMENT of 50 other *Parochial Benefices and Chapelries*, within the range of the *Metropolitan Police;* shewing the amount at which each Benefice is Rated in the Kings Books; the Estimated Value of Real Property, in each Parish, as assessed to the Property Tax, in 1815; by which a fair Idea may be formed of the present annual Value of each Benefice, and the amount of Rateable Property in each, and the Sum at which Rated, as Returned to the Committee on the Police of the Metropolis in 1829; shewing also the Number of Friendly Societies, and Number of Members therein; and the amount of Charitable Bequests, annually, at the disposal of the Parochial Officers, in each Parish.

STATEMENT of the remainder of the *Parochial Benefices and Chapelries*, 70 in Number, within the County of MIDDLESEX; shewing in addition to what is exhibited in regard to the other Metropolitan Parishes, the Rental of each Parish, as Returned to the Committee on the Select Vestries of the Metropolis, in 1830. *** *Those Parishes in blank, under the head of Estimate of Property as Returned to the Police Committee in* 1829, *(except Hammersmith) are without the pale of the Metropolitan Police. The return of Rateable and Rated Property states that the Amount for Hammersmith is included with Fulham, but it appears to have been omitted.*

The amounts for Brompton, Camden Town, Old Brentford, Highgate, Hounslow, Kentish Town, and Knightsbridge are included in the several Parishes to which they respectively belong, and to which the Numbers refer.

Remainder of BENEFICES, *in the County of* MIDDLESEX, *in Alphabetical Order, with No. of reference to their Position, in the Topographical arrangement.*	*Presentation of* BENEFICES, *vested in*	*Amount at which Rated in the Kings Books.* £ s. d.	*Estimate present annual Value of Benefice.*	*Estimated Annual Value of Property, as returned for the* PROPERTY TAX, *in* 1815.	*Estimate of* PROPERTY, *as Returned to Police Committee, in* 1829.		*Rental as Returned to Committee on Select Vestries in* 1830.	*Number of Friendly Societ.*	*No. of Members in do., in* 1802.	*do. in do., in* 1815.	*Amount of Charitable Bequests, annually, as Stated in the Parochial Returns.*

Total METROPOLIS.			1,097,896	1,304,359	1,574,689	712,201	816,080	1,860,000

*** *The Total Population of the first five Divisions of the Metropolis as exhibited at Page 3, is only 1,227,590, instead of 1,274,800; the difference arises from the average Number of Seamen, Strangers, &c., daily arriving and departing, being added and included above;— See Note to the detailed Statement of the 97 Parishes within the Walls of the City of London, for an elucidation of the discrepancy of the Numbers in 1801, as well, as for the diminution of Numbers therein, since that date: The Statements of the Metropolitan Benefices will shew the further Parishes in Middlesex which are included in the above Statement; Out of the 330,000 Families comprised within the above prescribed limits of the Metropolis, 15,800 only were returned in 1821, as being employed in Agriculture, a great proportion of which, if duly enquired into, would prove to be employed in Horticulture for the supply of the Luxurious Classes, rather than in Agriculture; The Metropolis therefore, with an approximation to 2,000,000 of Persons, as far as the important question of subsistence and supply of all the necessaries and ordinary comforts of life is concerned, may be regarded as a prodigious absorbent of the products of the labor of the Country, without offering any substantive return; The remission from the Country of Rent and Taxes in Money, constituting the means, whereby the Metropolis, obviates the invidiousness of levying its subsistence in kind, into which principle, in effect, the operation of supply virtually resolves itself.*

STATEMENT shewing the Amount of the *Parochial Assessments* in all ENGLAND and WALES, and the proportion thereof expended for other purposes than the Relief of the Poor, annually on an average of the three Years ending Easter 1750; in the Year ending Easter 1776; annually on an average of the three Years ending Easter 1785; in the Year ending Easter 1803; and in each of the 18 Years 1812—29, ending Easter 1830; shewing also the Amount expended for the Maintenance of the Poor, distinguishing the proportion thereof, so expended in the County of MIDDLESEX, in each of those Periods and Years, together with the Number of Committals for CRIME in the County of Middlesex, in each of the 25 Years 1805-30, the annual average price of Wheat, with the amount of Money expended in each Year, for the Maintenance of the Poor, converted into Quarters of Wheat.

Years	*TOTAL Amount of Parochial Assessments.* —£—	*Proportion Expended for other purposes than Relief of the Poor.* —£—	*Proportion Expended for Relief of the Poor.* *England and Wales.* —£—	*County of Middlesex.* —£—	*Number of Committals for Crime in the County of Middlesex, one year of 7 Years 1805–11.—1322.*	*Annual average Price of Wheat*	*Equivalent in Quarters of Wheat, of Column No. 4.*

The Number of Children in the County of Middlesex belonging to those permanently *relieved out of Workhouse in* 1802–3, *was* 4,347 *under* 5 *Years of Age; and* 6,690 *from* 5 *to* 14, *and out of the Total Number relieved* 8,407 *were above* 60 *Years of Age, or disabled from labor by permanent illness or other infirmity: of the amount expended for maintenance of the Poor in the same Year,* £ 224,048 *was the proportion for those maintained in Workhouse, being at the rate of* £ 14 14 10 ℔ *head.*

On referring to the Statement of the Assessment and Expenditure of the several out Parishes of the Metropolis, the rate ℔ *head for maintenance of the Poor in Workhouse, in the Year ending Easter* 1803, *will be seen to vary from* £ 6 18 0 *in St. John Wapping, to* £ 44 13 9 *in St. Mary Islington; this disparity (admitting the accounts to be correct) bespeaks extreme insufficiency on one side, or great profusion on the other; but, the probability is, that the disparity arises more from the want of method and competency in making up the accounts than from any actual difference in the scale or cost of subsistence; items which in one case will be charged under one head, will in another case be charged under other heads, precluding all fair comparison, and thereby shewing the desirableness for some uniform mode of account being adopted and enforced into practice, in all the parishes of the Kingdom.*

STATEMENT shewing the amount of Money Expended for the *Relief of the POOR*, in the Cities of LONDON and WESTMINSTER, and in each of the principal Parishes and Districts, within the COUNTY of MIDDLESEX, in the Year ending Easter 1776; annually, on an average of the three Years ending Easter 1785; in the Year ending Easter 1803; and annually, in each of the 17 Years ending Easter, or the 25th. of March 1829.

The feature first deserving of attention in the above Statement, is the large amount expended for the relief of the Poor within the Walls of the City of London; which relatively, very considerably exceeds, the amount expended for the like purpose in any other place in England; the Church, Bye Highway Rates, Law Charges, and other local Rates, also exceed in the like proportion, the similar charges in any other place; it is deserving of attention, how far so many small Parishes, might be formed into five, or fewer Divisions for Parochial purposes; Bristol, Norwich, and other places afford precedents, and reference, for the consideration of adopting such a measure: most of the out Parishes exhibit extraordinary increases since 1776; but, the Population of those Parishes, has, since that date increased in corresponding proportions, whilst the City of London within the Walls, has progressively decreased in Population, *(see Note to Statement of the Population of each of the 97 Parishes.)* The operative part of the Silk Manufacture, prevails more particularly in the Parish of St. Matthew, Bethnall Green; and Mile End, Old Town; partially in St. Leonard, Shoreditch; and very partially in the Parish of Hackney: Christ Church, Spitalfields, is the original seat of the Manufacture, and in which many of the principal employers still reside, but the Parish being circumscribed, it precludes any extension of Population, within its limits, and occasions the spreading of the operatives over the adjoining Parishes. For 60 Years previous to 1823, the Rate of Wages for Weaving of Silks in this District had been regulated by legislative enactments, and during the whole of that period, the District exhibited, relatively, less poverty and Parochial burthen, than any other Manufacturing District in the Kingdom; in the Session of Parliament 1823 all those enactmens were repealed, whereby the employees became more directly subjected to the will of the employers,—see the effect, as exemplified above, in the difference of Parochial Expenditure.

☞ *For the Population of each of the out Parishes, see Statement of the Topographical Position thereof.*

STATEMENT shewing the Amount of Money expended for the Relief of the Poor, in each of the 14 Parishes and Districts, forming part of the METROPOLIS; and the Total thereof: and also of the amount in the like manner expended for the same purpose, in each of 15 of the principal Cities and Towns in different parts of the Kingdom, in the Year ending Easter 1776; annually, on an average of the three Years ending Easter 1785; in the Year ending Easter 1803; and annually, in each of the 17 Years ending Easter, or the 25th. March 1829: shewing also the Estimated Value of the Real Property according to the Property Tax Returns of 1815; and the Population of each Parish, District, City, and Town, at each of the 3 Periods 1801, 1811, and 1821.

The following features of this account deserve attention, Viz.; 1st., the inconsiderable amount in Liverpool, being only in the proportion of 1 to 6, as compared with the City of London within the Walls; 2nd. the sudden diminution of Amount in the Town of Sheffield since 1821-2; 3rd. the great fluctuations in Nottingham and Leicester, between 1815 and 1823; 4th. the large amount of Birmingham, as compared either with Sheffield or Manchester; 5th. the Panics of 1816 and 1825 are strongly manifested in Manchester.

STATEMENT shewing the Number of Houses, assessed to the *House and Window Duty*, with the Rental at which the Houses were assessed, in each of 16 Classes, from *l.* 10 to *l.* 400 ℔ annum, and upwards; and the Houses in 10 Classes, having 8 to 180 Windows, and upwards, in each of the Eight Great Metropolitan Divisions, within the County of Middlesex, and the Total of the County, in the Year ending the 5th. of April 1830; shewing also the Total Number assessed in the County of Middlesex, at Rentals of *l.* 20 ℔ annum, and upwards, and having 10 Windows, and upwards, in the Year ending the 5th. of April 1823, and the Rate at which assessed for the House Duty.

*** According to this Statement, the Number of Houses in the County of Middlesex, assessed to the House Tax at Rentals of L20 ℔ annum, and upwards, have increased 12,561, since 1823. In 1821, the Total Number of Houses Inhabited in the County of Middlesex, was returned at 152,969, which in 1831, will probably have increased to 180,000; 495 of which being Farm Houses occupied by Tenants, are *exempt*,—leaving upwards of 63,000 Houses below L10 ℔ annum Rental: The Return of Houses assessed to Window Duty in 1823, was in Six Classes only, as follows, Viz. having from 10 to 14 Windows; 15 to 19; 20 to 29; 30 to 39; 40 to 49; and 50, and upwards; this Classification precludes a fair comparison being made with the Return of 1830; but, as far as inference serves, the Number appears not to have increased.—see following Page, and Note thereto. ☞ *The Figures at the head of the Columns refer to the Number of the Parishes in the Topographical Arrangement of the Metropolis;—see the same, for Value of Property, Population, &c. of each.*

Rate of Duty, in the £.

*** The difference of 1,342 in the Number of Windows, under the head of Inns of Court and Chancery, is so many *Chambers* Assessed in those Institutions.

STATEMENT of the Number of Houses, assessed to the *House and Window Duty*, in each of the four remaining Divisions of the METROPOLIS, in the Counties of SURREY, KENT, and ESSEX, and the Total of the Metropolis; shewing also the Number assessed to the like Duties in each of the Counties of Lancaster, Somerset, Gloucester, and Sussex, as containing the greatest proportion of Houses assessed at high Rentals; the Totals exhibited in comparison with the Total in each Class of assessment, in all *England and Wales*, arranged to correspond with the Statement on the preceding Page.

*** *The Total Gross Receipt of the House Duty in all England and Wales, in the Year ending the 5th. of January* 1830, *as credited in the Finance Accounts for that Year, was l.* 1,241,791; *the proportion of the Metropolis as exhibited below, being l.* 770,166, *exceeds ⅝ of the whole; it is proper, however, to observe, in regard to this comparison, that the Duty on l.* 11,154,109 *of Rental, in all England and Wales, at the Rates of Duty, as exhibited on the preceding Page amounts to l.* 1,327,940; *whether the difference of l.* 86,149 *arises from arrears, awards on appeals, or from some other cause, cannot here be determined; the difference deserves consideration, in forming an estimate of the proportion between the Metropolis, and all England and Wales: the Rate of Duty on Windows, varies in a way to preclude the forming an estimate of the proceeds of the Duty from the Statement below, but the fair inference is, that the proportion of Amount which the Window Duty in the Metropolis, bears to the Duty in the whole of England and Wales, is about one-third.*

*** The difference between the details and Total of Houses assessed to Window Duty in all England and Wales, is, 1342 Chambers in Inns of Court in London; 1243 do., in the University of Oxford; and 1065 in that of Cambridge.—Vide Par. Papers, Nos. 123–4, Session 1831.

STATEMENT shewing the Number of Houses, assessed to the *House and Window Duty*, with the Rental at which the Houses were assessed, in each of 16 Classes, from *l.* 10 to *l.* 400 ℔ annum, and upwards; and the Houses in 10 Classes, having 8 to 180 Windows, and upwards, in each of the Eight Great Metropolitan Divisions, within the County of Middlesex, and the Total of the County, in the Year ending the 5th. of April 1830; shewing also the Total Number assessed in the County of Middlesex, at Rentals of *l.* 20 ℔ annum, and upwards, and having 10 Windows, and upwards, in the Year ending the 5th. of April 1823, and the Rate at which assessed for the House Duty.

*** According to this Statement, the Number of Houses in the County of Middlesex, assessed to the House Tax at Rentals of L20 ℔ annum, and upwards, have increased 12,561, since 1823. In 1821, the Total Number of Houses Inhabited in the County of Middlesex, was returned at 152,969, which in 1831, will probably have increased to 180,000; 495 of which being Farm Houses occupied by Tenants, are *exempt*,—leaving upwards of 63,000 Houses below L10 ℔ annum Rental: The Return of Houses assessed to Window Duty in 1823, was in Six Classes only, as follows, Viz. having from 10 to 14 Windows; 15 to 19; 20 to 29; 30 to 39; 40 to 49; and 50, and upwards; this Classification precludes a fair comparison being made with the Return of 1830; but, as far as inference serves, the Number appears not to have increased.—see following Page, and Note thereto. ☞ *The Figures at the head of the Columns refer to the Number of the Parishes in the Topographical Arrangement of the Metropolis;—see the same, for Value of Property, Population, &c. of each.*

STATEMENT of the Number of Houses, assessed to the *House and Window Duty*, in each of the four remaining Divisions of the METROPOLIS, in the Counties of SURREY, KENT, and ESSEX, and the Total of the Metropolis; shewing also the Number assessed to the like Duties in each of the Counties of Lancaster, Somerset, Gloucester, and Sussex, as containing the greatest proportion of Houses assessed at high Rentals; the Totals exhibited in comparison with the Total in each Class of assessment, in all *England and Wales*, arranged to correspond with the Statement on the preceding Page.

*** *The Total Gross Receipt of the House Duty in all England and Wales, in the Year ending the 5th. of January* 1830, *as credited in the Finance Accounts for that Year, was l.* 1,241,791; *the proportion of the Metropolis as exhibited below, being l.* 770,166, *exceeds ⅛ of the whole; it is proper, however, to observe, in regard to this comparison, that the Duty on l.* 11,154,109 *of Rental, in all England and Wales, at the Rates of Duty, as exhibited on the preceding Page amounts to l.* 1,327,940; *whether the difference of l.* 86,149 *arises from arrears, awards on appeals, or from some other cause, cannot here be determined; the difference deserves consideration, in forming an estimate of the proportion between the Metropolis, and all England and Wales: the Rate of Duty on Windows, varies in a way to preclude the forming an estimate of the proceeds of the Duty from the Statement below, but the fair inference is, that the proportion of Amount which the Window Duty in the Metropolis, bears to the Duty in the whole of England and Wales, is about one-third.*

	At Rentals of		County of Middlesex	Borough of Southwark	Brixton Hundred, *Surrey*	Blackheath Hundred, *Kent*	Becontree Hundred, *Essex*	*Total* Metropolis	Counties of Lancaster	Somerset	Gloucest.	Sussex	*Total of the 5 preceding Columns*	TOTAL England and Wales.

‡ These Annuities having prematurely expired they were not included in the account from which the above Statement was compiled, and it was not till discrepancy after discrepancy had been pointed out, and the Statement above completed, that the two accounts could be reconciled, had they been included, they would have made the operation of the Annuities in the aggregate appear somewhat less unfavorable; but their being excluded does not in the slightest degree affect the correctness of the above Statement as it now stands, either in principle or detail.

STATEMENT shewing the POPULATION of each County of *ENGLAND and WALES* in 1801, and the Number of MARRIAGES, BAPTISMS, and BURIALS, in each of the same, in the Ten Years 1801–10; distinguishing the proportion of Males and Females in each County; the Counties being arranged in Order of their TOTAL POPULATION, in 1801.

Population in 1801, Marriages, Baptisms, and Burials, in the 10 Years 1801–10, in each County, of England and Wales.

The STATEMENT below, which is a Continuation of that on the preceding Page, shews the Ratio of MARRIAGES, in the 10 Years 1801-10, to every 100 of the POPULATION in 1801, in each County of *England and Wales*, and of BAPTISMS and BURIALS, to a MARRIAGE, during the same period, also the excess of BAPTISMS over BURIALS, and the increase or decrease of POPULATION in 1811, over and above, or under and below, the excess of BAPTISMS over BURIALS.

COUNTIES *arranged in order of* TOTAL POPULATION *in* 1801		Number of reference to Geographical Position.	Ratio of Marriages to every 100 of the Population, as in Col. No. 3.	Ratio of Baptisms, to a Marriage.	Ratio of Burials, to a Marriage.	Excess in the 10 Years 1801-1810. of BAPTISMS over BURIALS.		TOTAL Increase in the 10 Years 1801-1810.		TOTAL Increase exceeding the Excess of BAPTISMS over BURIALS.		Excess of BAPTISMS over BURIALS exceeding the TOTAL Increase.

Ratio of Marriages, to Total Population, and of Baptisms, and Burials, to a Marriage, and Total increase of Population, &c., &c., in the 10 Years 1811-1820

STATEMENT shewing the TOTAL POPULATION in each County of *England and Wales*, as enumerated at each of the Three Periods 1801, 1811, and 1821. The Counties arranged in Order of their Total Population in the latter Year. The Total Number of *Marriages*, *Baptisms*, and *Burials*, in each County, in each of the Ten Years ending with 1790, 1800, 1810, and 1820. The Ratio of *Marriages*, in each of the 10 Years ending with 1800, 1810, and 1820, to every 1,000 of the Population in each County, as enumerated in each of those Years, and the Ratio of *Baptisms*, and *Burials*, in each County to every 100 *Marriages*, in each of the Ten Years ending with 1790, 1800, 1810, and 1820, together with a Column shewing the rate of increase on every 100 of the Population, in each County, in the Twenty Years ending with 1820.

	Counties arranged in Order of their TOTAL POPULATION *in* 1821.	TOTAL POPULATION, *as enumerated at each of the Three Periods*			TOTAL *Number of* MARRIAGES, *in each of the Ten Years ending with*				TOTAL *Number of* BAPITSMS, *in each of the Ten Years ending with*

*** The Statement below will be seen to be a continuation of that on the preceding Page, and to contain an exhibition of the progressive change in the procreative and decremental state of the Population of *England and Wales*, in the Forty Years ending with 1820. The Parish Register Returns up to 1800, were more or less defective, those from the Counties only noted with an * in the first Column of the Ratio of *Marriages* being considered complete. The Totals for each of the Ten Years ending with 1790, and 1800, contain 182,243 Baptisms, and 113,454 Burials, more than the details, a Summary of additional Returns to that amount being included in the Totals, this defect in the Returns will be seen to affect the fair comparison of the Numbers in the Counties with one another, but not the *Ratios*, which is the more and most important feature of the account, and one which will be seen to deserve in a very high degree the attention equally of the Statesmen, Physiologists, and Moralists, of all Countries. It has been a generally received opinion that Marshy Countries or districts, are unfavorable to an increase of Population, as well from their tendency to retard or check fecundity, as accelerating Mortality. The Counties of England which wholly or partially come under the denomination of low Countries are Numbers 8, 11, 12, 36, and 41, which Counties will be seen to exhibit the greatest changes both in the increase of Births and decrease of Mortality, but it is a fact worthy of being known to the patriotic and philosophical enquirers of all Countries, that during the period of the important changes which the account below exhibits, the Marshes in the Counties in question have been converted by drainage from dreary and pestilential Wastes, to the most productive tracts in Europe.

Counties arranged in order of their TOTAL POPULATION *in* 1821.	TOTAL *Number of* BURIALS *in each of the Ten Years ending with*				*Ratio of* MARRIAGES, *to every* 1,000 *of the* POPULATION, *in each of the* 10 *Yrs.*			*Ratio of BAPTISMS, to every* 100 *Marriages, in each of the* 10 *Years ending with*				*Ratio of BURIALS, to every* 100 *Marriages, in each of the* 10 *Years ending with*				*Rate of increase per Cent. of Population, in the last Ten Years.*

STATEMENT shewing the Total Number of BAPTISMS and BURIALS, in each County of *ENGLAND and WALES*, in each of the 7 Years 1798–1804. *** *The Baptisms and Burials for these Years, have been distinctly exhibited in consequence of its appearing to have been one of the most remarkable periods in the History of the Country; a period in which the whole World, either openly or insidiously were in hostile array against Great Britain. Yet, as appears by the General Statement of the Baptisms and Burials, in all England and Wales, after the first effects of the War had subsided, contrary to all received opinion, as to the effects of War upon the progress of Population; England and Wales exhibits an unprecedented increase; the excess of Baptisms over Burials in 1798, considerably exceeding the like excess in any former Year, which progress of increase however was very sensibly checked, by the unprecedented high money price of subsistence in the Years 1800 and 1801: but, the increase since that period is still more remarkable, and the inequalities of the effect of the price of subsistence in those two Years is a feature of the account that deserves particular attention: some of the Counties appear to have felt the effects in 1800, and others not till 1802 and 1803.* †† *The Returns up to 1800, were incomplete, the Numbers affixed to some of the Counties, imply the Number of Parishes, or Chapelries, whose returns were deficient: from those noted with an * they were considered complete;—see Note t General Statement of all England and Wales*

STATEMENT shewing the Total Number of *Baptisms*, and of *Burials*, in each County of *ENGLAND and WALES*, in each of 14 different Years from 1700, to 1820. The Counties arranged in Order of their TOTAL POPULATION in 1821. *** The Years selected for exhibition have been as follows, Viz. 1700, as the first Year of the Period, and in which the *Baptisms* exceeded the *Burials* by nearly 20,000, whilst in 1710, 1720, and 1730, the *Burials* exceeded the *Baptisms* in the latter Year by upwards of 15,000. In 1740, the *Baptisms* exceeded the *Burials* by only 1,984; In 1750, by 25,498; In 1760, by 31,431; In 1770, by 32,577; In 1780, by 29,826; the four following Years exhibit an increase of 3 to 7,000; and in 1785, the Year of Peace after the American War the excess of *Baptisms* and *Burials* amounted to 51,759.—*see Continuation of Note on following Page.*

*** From 1785, to 1792, the increase was progressive, the excess of Baptisms over Burials in the latter Year having been 78,653. The War declared in February 1793, appears to have diminished the Number of Baptisms, and increased the Burials, so that in 1795, the excess was only 43,890, while the excitements occasioned by the high money prices in 1796–8, increased the excess again in 1798, to 81,024,—the next Year exhibited is 1801, which exhibits the greatest change of the whole, occasioned doubtless by the unprecedented high money price of Subsistence in the preceding Year. In 1801, in the Metropolis, and the Counties of Lancaster, Warwick, and Worcester, the Burials will be seen to have exceeded the Baptisms, whilst on the other hand the Agricultural Counties of Norfolk, Lincoln, Suffolk, Cambridge, and Sussex, appear not to have been at all affected by the change, an exception which deserves particular attention, inasmuch as at a later period they appear to be Counties in which the pressure of Parochial burthens have been the most severely felt. The Peace of Amiens in 1802–3, appears to have produced the usual effects of a considerable increase of Baptisms, and 1804 exhibits a sensible decrease of Burials, so that the excess of Baptisms over Burials in that Year amounted to 113,315. During the Six following Years the Number of Burials gradually increased, so that the excess of Baptisms over Burials in 1810, was only 90,669. The general Peace in 1815, again produced an increase of Baptisms exceeding 25,000, and the excess of Baptisms over Burials in that Year, will be seen by the aggregate Statement of all England and Wales to have amounted to 147,523, which in 1818, was reduced to 117,760: on comparing these results with the Money Rate of Wages, and price of Subsistence, which will be found in other parts of this Work, they appear to have produced a sensible effect upon the Physical, and Social condition of the People, as far as such evidence warrants any conclusion being drawn on the subject.

STATEMENT shewing the various Offences, for which the Persons in the preceding Statement were *Committed*, and the proportion against whom *no Bill was found*, the proportion *Acquitted*, and the Number *Convicted*, shewing also the several degrees of Punishment inflicted on those Convicted, and the Number Executed, in each of the 25 Years 1805–1829.

*** *These Statements it must be admitted, exhibit a very unfavorable picture of British Society, more especially so when it is considered, that they exhibit only those Criminals who have been committed for Trial at the Assizes; the Numbers Committed under* Summary Process, *exceeding those Committed for Trial at the Assizes, by several thousands annually: nor does the subject appear more favorable when viewed in comparison with the extent of Crime in other Countries, as will be seen by the Statement of following Pages; and when viewed in comparison with the extent of Crime in England from the middle of the last Century as far as the account of the Number of Convictions in London and Middlesex serves for a comparison, the result is fearfully unfavorable; it is somewhat consolatary however to see, that the more atrocious offences against the Person, have not materially increased.*

A Return of the No. of Persons convicted of Forgery, or passing of Forged Notes of the Bank of England, in each of the 33 *Years* 1797–1829, *represents* 1138 *Persons to have been convicted in the* 6 *Years* 1816–1821.—*Vide Par. Paper No.* 442, *Session* 1830: *whilst the Statement below represents only* 767 *to have been convicted in those* 6 *Years in all England and Wales!!!*

The annexed STATEMENT exhibits the *annual aver.* No. of *Capital Convictions & Executions*, in LONDON and MIDDLESEX, during the 81 Years 1749-1829. The account for the Years 1749-1817, was presented to Parliament in the Session of 1818, Vide Vol. XVI. of Papers of that Session;—it was at first considered that the Convictions applied to all who were not either acquited or against whom no Bill was found, but on perceiving the vast disparity between the Total Number or Convictions since 1817, when compared with those of previous Years, it led to a further investigation of the accounts, when it proved, that the Number Convicted comprised those only who were *Sentenced to Death*, termed *Capital Convictions;* and hence, it will be perceived that the annexed account affords no just criterion of the relative extent of *CRIME*, at the different periods in the aggregate; inasmuch as the spirit and temper of the Courts and the Times may have tended considerably to influence the nature of the Sentences; the Number of Executions when relatively considered will be seen to have greatly diminished, but whether as a cause of less atrocity of *CRIME*, or a less sanguinary infliction of Punishment does not appear. For the Years 1811-22, of the account below, see Folio 282, Appendix to Report on the Police of the Metropolis, Session 1828; and for the Years 1823-9, Folio 7, Par. Pa. No. 197, Session 1830; of the Number Committed for all other Offences in 1812, (line 35) 71 were for taking and administering unlawful oaths; 21 for Frame breaking and destroying of Machinery; and 13 for *High Treason*: the Numbers in the same line, in the Years 1823-9, arise from a modification of the Law relating to *Burglary*, the Numbers Committed for Burglary, (line 4) shewing a corresponding diminution.

The above Statement shews the change that has taken place in the relative importance of the English Counties since 1700, in a more perspicuous point of view, than any in which it has heretofore been exhibited; the increase is seen to preponderate greatly in the Manufacturing and Mining Districts, while the Statement of the Population of the Principal Towns of England and Wales, shews that the increase of the Agricultural Counties is principally in the Towns; so, that the Rural Population of England, as, in the Agricultural Counties of Scotland, appears not materially, if at all, to have increased since 1700. The ratio of increase in the aggregate of the Kingdom in the 10 Years ending with Easter 1831, is less than in the preceding 10 Years, which may be accounted for by the large Number of Soldiers and Seamen, dispersed over the Country between 1815 and 1821, making due allowance for that extraneous excess, during that period, the ratio of increase from 1821 to 1831 is remarkable for its uniformity.

Counties of England, arranged in Order of Ratio of Increase, since 1700; with the Ratio ₰ Ct. of Increase, in each Co. at each of the 4 Ten Yearly Periods 1801 to 1831

STATEMENT shewing the proportion and parts of *SCOTLAND*, engaged in *Manufacturing*, distinct from the *Agricultural and Highland Counties*, with the annual Value of Real Property in each Division; by this Analysis, it is seen, that the increase of Population since 1755, has been wholly concentrated in the Towns and Manufacturing Districts, and that while in the 75 Years, the Total Number has doubled, the *Agricultural Population* has remained stationary. The gregarious tendency, and preponderance of Town Population, which this Statement shews to have prevailed in Scotland, whether considered as a question of general Policy, or of individual advantage, merits the serious regard of a Wise and Paternal Government; the suggestions which the preponderance excite, are too numerous and important to be entered upon here, they will be found adverted to, in the introductory Pages.

*There are two disparities, noted with an * which require explanation; the Number of Families in Dunfermline Burgh in* 1811, *are stated at* 5,601, *the* 5 *should doubtless have been* 2, *it of course alters the Totals and proportions of the Columns to which it applies; The Parish of Govan in the under Ward of Lanark in* 1811, *included a part of the Gorbals of Glasgow, which in* 1821, *was returned under that head, take the 2 lines of Under Ward and Glasgow together, and the disparity is reconciled.*

	TOWNS and COUNTIES, arranged in reference to their order of OCCUPATION and PRODUCTION. *with Number of reference to their* Topographical Arrangement.	Annual Value of Real Property as assessed to the Property Tax, in 1815. £	*TOTAL Number of FAMILIES, chiefly Employed in*								*Total* POPULATION, *at each of the three Periods.*		
			Agricul-ture.	*Trade, Manufac-tures, or Handicraft*	*all other.*	*TOTAL.* 1811.	1821.	*Agricul-ture.*	*Trade, Manufac-tures, or Handicraft*	*all other.*	1755.	1811.	1831.

SUMMARY of the 82 Pages 8 — 90 shewing the proportion of the POPULATION of *GREAT BRITAIN;* engaged in, and dependant on each great branch of Production and Occupation.

The first Lord Ellenborough in his place in Parliament once stated that there were upwards of 3,000,000 Persons in Great Britain, engaged in, and dependant on the Woolen Manufacture; the Edinburgh Review more recently asserted, that upwards of 1,000,000 Persons were so occupied and dependant: from the Statement below, it will be seen to be doubtful, whether in all its varied operations, more than 250,000 (certainly not 300,000) Persons, are engaged in, or dependant on that branch of Industry: similarly mistaken notions almost universally prevail, in regard to the greater or lesser extent and importance, of each great branch of Production, and Occupation; one important conclusion deducible from the following analysis, is, (comparatively speaking,) the limited proportion of the Population engaged in Manufacturing, that is in the prevailing acceptation of the term Manufacturing. The middle Column of occupations, it is important to understand, includes all Artificers, such as Masons, Carpenters, Smiths, Wheelwrights, &c. &c.; as well as Maltsters, Millers, Bakers, and Butchers; and Handicraftsmen such as Tailors, Shoemakers, &c., and all Interchangers or Shopkeepers, and Carriers, so that it is questionable, whether out of a Population exceeding 14,000,000 more than 600,000 Persons are actually engaged in, and 1,000,000 wholly dependant on Manufactoring employment for subsistence.

	DISTRICTS of Production and Occupation. *** Nos. 4 and 6 include a considerable number of Manufacturers; but Nos. 13 and 17 on the other hand include probably a greater No. engaged in Mining than Nos. 4 and 6 do in Manufacturing.*	*Numbers of reference to the Districts in the* Topographical Arrangement.	Number of FAMILIES, as returned in 1821, chiefly employed in				TOTAL *Number of* PERSONS.

The following STATEMENT shews the progressive increase of the Population in England, Wales, and Scotland, at each of the six Ten Yearly Periods, since 1780, *and the annexed Statement shews the probable proportion of the Population in* 1821, *in* 12 *Classes, instead of under three heads only, as exhibited in the return made to Parliament, with the change which a similar analysis of the Numbers in* 1831, *will probably exhibit. The feature most deserving attention in this Statement, is, the stationary Number of Agricultural employers, while the Laborers tend progressively to increase, and the comparatively inconsiderable Number of Manufacturers.*

Decrease of Annuitants, since 5th. January 1823.

*** According to the above Statement, there appears in the 6 Years, from the 5th. January 1823, to the 5th. January 1829, to have been a diminution of no less than 14,380 holders of the Stocks, in Cols. No. 1, to 4, 6 and 7; a portion of which holders appear to have changed their Interest from the Perpetual, to the Long Annuities, which shew an increase in the Six Years of 2,748, (*Vide* Col. No. 8.) It will be seen on closer inspection, that the holders of the Long Annuities, above £200 ℔ Annum, have also diminished from 488 to 434, the 54 decreased having *Retailed* out their Interest in small amounts; the bulk of the increase being in the Class below £10 ℔ Annum. The 4 ℔ Cents. of 1826, (see Col. No. 5.) also shew a tendency to subdivide into small amounts, and the Total increase under that Head in 1829, being 3,513, makes the balance of decrease in the 6 Years, in the Number of holders, to be 8,119, as stated in Col. No. 9., 5,601, of which it will be seen are of the Class below £10 ℔ Annum, a portion of whom have doubtless changed their Interest from Perpetual, to Life Annuities, the increase of the Government Life Annuitants in the 6 Years having been about 3,000. The 3½ ℔ Cents. in Col. No. 3, were reduced from 4 ℔ Cent. in 1824, when £6,197,013, of the Capital of that Stock was paid off, which will account for the disproportionate share of decrease of holders thereof, and increase of Long Annuitants. Interesting as both the details and results of the above accounts really are, they are still very imperfect,— because many Persons hold of more than one denomination of Stock, and some probably hold of all of them, whilst on the other hand, some large amounts will doubtless stand in the Names of one, or a few individuals in trust for numerous bodies of Persons, such for instance as the Forty Millions Value in the Name of the Accountant General of the Court of Chancery, the Trustees of the Equitable and Royal Exchange Insurances, and other similar Establishments; sufficient however is exhibited to shew, *bugbear*, as the *National Debt* so called, always seems even to the intelligent, as well as the superficial, when viewed in the aggregate how very insignificant it seems when viewed in relation to its details, its 220,000 Annuitants, of pittances varying from 50*fo*, to less than £50 ℔ Annum each,— what would become of many of them if the account was cancelled? The account presented to the Lords in 1828, will be seen to differ in its form from those presented to the Commons, the first exhibits the Number with *Yearly*, and the latter with *Half Yearly* Dividends, there is a discrepancy also in the Lords Paper, in regard to the amount of the Total Sum divided, which in the Return is stated as above, at £23,265,983, while the Dividends on the several Stocks enumerated, amount, as shewn in detail with their respective Capitals to £24,913,495, and further, neither of the Returns exhibit more than a part of the account, as will be seen by the annexed Statement, which shews the whole of the Public Debt, Funded and Unfunded, as it stood on the 5th. January 1829

*** *It deserves to be noticed, in reference to these* 10 *Years, that although the remuneration for labour was reduced one half, there was no material alteration in the Value of the products of labor until* 1808; *the variation resolving itself into a transfer of the fair reward for labor, to profits; the quantity Exported Annually, Averages* £24,457,721, *and the Value* £40,707,491, *upon which data the calculations below are founded. In* 1802–3., *the Quantity Averaged* £24,632,105, *and the value* £44,300,767.

† In 1815, Annuities were created to the Amount of £3,085,621, equal to £100,767,354, of 3 per Cent. Stock, for which only £59,281,786, of Paper Money was received, being at the Rate of only £59 7s. 3d. of Money received, for every £100 of Stock created.

☞ *No Annual consecutive Return, of Parochial Assesment prior to* 1812. *In* 1803, *the Amount was* £5,348,204; *the Annual average of the* 3 *Years* 1783–5, £2,167,748; *for the Year* 1776, £1,720,316; *and the Annual Average of the* 3 *Years* 1748–50, £730,135.

STATEMENT of the amount of the *PAROCHIAL ASSESSMENTS*, in each of the Metropolitan Parishes within the County of MIDDLESEX, in each of the three Years ending Easter 1776; 1785; and 1803; shewing the Rate of Assessment, and the Number of Persons Relieved under 7 different heads in the latter Year, with the Total Number of Houses, Families, and Persons in each Parish, in 1801; The following Page shewing the amount Expended for Relief of the Poor in the Year ending Easter 1803.

*** *For the details of the 97 Parishes, within the Walls of the City of London,— see preceding Page.*

For the cause of the decrease of Population in the City of London, within the Walls,—see Note to Page 5. Part of St. Clement Danes, is without the City of Westminster,—see No. 29, Page 2, but as the Parochial amounts are wholly returned with the Westminster part of the Parish, the Total Population is given in the same line, which occasions the Total of the City of Westminster not to agree with the details. Demolitions for widening and improving the great thoroughfare between London and Westminster, and for the London and St. Katharines Docks have occasioned the diminution of Population in the Parishes of St. Martin, in the Fields; St. John, Wapping; St. Botolph, without Aldgate; and St. Katharine, by the Tower. The annexed *extra Parochial* Places making no Parochial Returns, are not included below, the Nos. refer to their Position in page 2, the other figures denote the Population of each, in 1831.

POPULATION in 1831.

*** *This account has been compiled from a Return made to Parliament, pursuant to an Act passed in the fifty-fifth Year of the Reign of George III. Ordered to be Printed March* 1818,—*see Paper, No.* 82, *of that Session: On comparing the amounts with the detailed accounts, which are exhibited of some of the Parishes,—Islington, St. Lukes, and St. George, Bloomsbury, &c.; they appear to be defective; and indeed, until some permanent and well organized Establishment, formed expressly for Statistical enquiries and investigation, is instituted no useful result or satisfactory conclusion in regard to the Rescources, and actual Condition of Local Districts can be expected to be arrived at.*

Amount of PAROCHIAL EXPENDITURE, *in each of the three succeding Years enaing Easter* 1815.

Maintenance of the POOR.			*Law Charges, Removals*			*Militia Charges*			*Church, County Rate, &c.*			TOTAL			*Rental of the several Parishes, as returned to the Michaelmas Session in* 1829.	*No. of Friendly Societ. in* 1803.	*Number of Members, in* 1803.	*do., in* 1815.	*Amount of Charitable Donations at the disposal of the Parochial Officers.*

STATEMENT of the preceding page, Concluded :— to which is added an ACCOUNT of the Amount expended for the Maintenance of the Poor, in each Parish in each of 9 Years 1816 — 1829. On referring to the Statement of the Total Amount of the Parochial Assessments in all England and Wales, the greatest amount, will be seen to have been in the Year ending Easter 1818, in which Year the proportion expended for the Maintenance of the Poor was £7,870,801; during the ensuing 5 Years the amount gradually decreased to £5,736,900 in the Year ending Easter 1824: since when the amount has gradually increased to £6,829,042 in the Year ending Easter 1829; the increase in the County of Middlesex having been from £523,587 in 1824, to £676,825 in 1829; the increase however appears not to have been uniform; in the Parishes noted with a † the amount is less in 1829 than in 1824, whilst those noted with an * deserve attention for their increased amount.

To form a correct estimate of the relative extent and pressure of Pauperism, in any given Parish at different Periods, it is necessary to know the Number of Persons Relieved, as well as the Number contributing to their Relief; the Return in 1802 as exhibited on the preceding Page, although far from being complete, is interesting as far as it goes, but it is deficient in not shewing the Number of Persons assessed, and the amounts at which assessed, distinguishing the proportion levied on Land in each Parish, distinct from the amount levied on Houses, &c.; the amount, also, Expended for the Maintenance of those Relieved Permanently out of Workhouse, should be stated distinct from the amount Expended for Casual Reliefs; and all sums Expended for Building, and Repair of Workhouses or Poors Cottages, as well as Mortuary, and all other Expenses should form a separate Column, so as the amount for Subsistence and Clothing exclusively, might be distinctly known. There has been no corresponding Return yet made to that of 1802, all fair comparison is therefore precluded.—see Note page 44, in regard to the Column of Rateable Property in 1829. The Parishes in Blank are not within the limits of the Metropolitan Police.

Amounts Expended for Maintenance of the POOR, in each of the undermentioned Years ending 25th. March.								Amended Return of Rateable Property in 1829.	*PARISHES in Alphabetical Order, with Number of reference to their Topographical Position, as ☞ Page 3.*		*Total Number of PERSONS, at each of the four Ten Yearly Periods.*

STATEMENT of the *Geographical Position*, of each of the 40 *Kingdoms, Provinces, Principalities, &c., &c.*, of the Peninsula of *SPAIN and PORTUGAL;* shewing the SUPERFICIES and POPULATION of each; increase ℔ Cent. of Population since the close of the last Century; and Ratio of Population ℔ Square Mile, in 1825. *** The Population of the Peninsula at the close of the last Century as exhibited below, has been taken from a work published in Paris during the occupation of Spain by the French in 1810; and the Numbers in 1825, have been taken from another Work recently Published in that City; other authorities represent the Population of Spain at the *commencement* of the last Century, at about 7,000,000: the increase since 1799, supposing the Numbers as stated below to be accurate, is remarkable; more particularly so, under the circumstances in which the Country during that period has been involved. The extreme Latitudes of the *Peninsula* are, from Cape Ortegal in Gallicia, in 43. 47 North, to *Gibraltar* in Andalusia in 36. 7 North: being a mean distance between those two Points of 533 English Statute Miles; but, as the South parts of Andalusia and Granada form a Promontary the average extent of the Peninsula from North to South will not exceed more than about 475 miles: the extremes of Longitude are, from the Rock, in 9. 35 West, 25 miles West of Lisbon; to Cape Rosas in Catalonia, in 3. 5 East, being a Total of 12 Degrees, 40 of Longitude, or 665 English Statute Miles; (the degree of Longitude between 37 and 43 of Latitude being 45½ Geographical, or 52½ English Statute Miles) but the average extent of *Longitude* will not exceed 10 Degrees, or about 525 English Statute Miles; these averages give a Total Superficies of 249,375 English Statute Miles, which corresponds, or nearly so, with the detailed Superficies below, supposing them intended as Geographical Miles.

STATEMENT shewing the Population, (distinguishing the proportion in Towns, from the proportion in the Villages,) in each of the 19 Provinces of the Kingdom of the *NETHERLANDS*, (as constituted in 1814) at each of the two Periods 1816 and 1825, the Provinces arranged in Order of their Total Population in 1816, with Number of Reference to their Geographical Position as exhibited on the preceding Page; shewing also the Total Number of *Marriages, Divorces, Births, & Deaths;* the increase ℔ Cent.; and the Total increase; the Total excess of Births over Deaths, and the Ratio of Births to every 100 Marriages, and of Deaths to every 100 Births, in the 10 Years 1815–24.

*** These Statements relating to the Population of the *NETHERLANDS*, have been compiled from an Official Work of 31 Sheets, printed at the Hague in 1827, in pursuance of an order of His Majesty's the King of the Netherlands, bearing date the 3rd. of July of the preceding Year; the first 10 Sheets purport to shew all the changes in the Numbers of the Population in each Province of the Kingdom, in each of the 10 Years 1815–24; the 11th. Sheet is a Summary of the 10 preceding Sheets; the 10 following Sheets purport to shew the change in each of the 10 Provinces separately, in each of the aforesaid 10 Years 1815–24; and the 31st. and last Sheet is a Summary of the 10 preceding ones; in this Work the proportion of the Births and Deaths to the Total Population distinguishing the Number in Towns, from the Number in the Villages, *(communes rurales)* is worked out to 2 places of Decimals, and the proportion in the Births and Deaths which the Males bore to the Females is worked out to 4 places of Decimals with various other minutiæ of detail; with such a display of circumstantiality it was deemed fair to suppose that some additional light on the subject of the causes which influence the changes and progress of Population might have been derived: but on investigation it proved, that the 31 Tables contained a greater display of calculation and detail, than Philosophy; for, it will be seen that whilst in *Liege* (see No. 17, in the Order of Geographical Position) the Births in the 10 Years 1815–24, exceeded the Deaths by 30,925, and only 986 in the 10 Years represented to have emigrated out of the province, the Population in 1825, is stated to be 27,084, less than in 1815; on the other hand, the increase represented to have taken place in *Luxembourg* is as irreconcileable, as is the decrease in *Liege*: and although the results of the other Provinces indicate a probable approximation to accuracy; they contain several trifling errors, the less excuseable on account of the display of minutiæ of calculation, whilst a suspicion is thrown over the whole by the results of the two Provinces here specifically adverted to.

The diminution of Births, and great increase of Mortality in 1817, *deserve notice; the result was probably occasioned by the extreme uncongeniality of the Season of* 1816. *In England and Wales in* 1817, *there was a diminution of Burials, without any diminution of Births; a great increase of Mortality however ensued: in* 1818–19 *the Number of* Divorces, *in North and South Holland, bespeaks peculiarities in the domestic habits of the People of those Provinces.*

PROVINCES, arranged in order of their TOTAL POPULATION.	*POPULATION, as enumerated in* 1816, *and* 1825.			*Number of Marriages*	*Divorces*	*Number of Births and Deaths, in the* 10 *Years* 1815-24.					*Increase ℔ Cent. in the* 10 *Years.*	*Ratio of Births to every* 100 *Marriages.*

STATEMENT of the Total Number of *Marriages, Baptisms, and Burials*, in all *ENGLAND and WALES*, at each of nine Ten Yearly Periods from 1700 to 1780, and in each of the Forty Years 1781–1820; shewing the excess of Baptisms over Burials in each Year. *** *In the first Return of Abstracts from the Parish Registers of the Kingdom made to Parliament in* 1801, *much difficulty was experienced in obtaining Returns from several Parishes, but after repeated applications* 280 *Places only remained from whence Returns could not be procured. (Vide Folio* 449, *of the Abstract printed in* 1801.) *and those on enquiry proved to be principally* Chapelries, *whose accounts were probably included in the Returns made from the Registers of their respective Parent Churches, and the Totals of the* 20 *Years* 1801–20, *include the unentered Marriages, Baptisms, and Burials, as well as the Registered, so that the account below may be considered as exhibiting a tolerably near approximation to a correct view of the progressive increase of Numbers since* 1740. *The Years most remarkable for change are noted with* + plus, *or* — minus. *The period* 1710–40, *(comprising the* 27 *Years of Peace which followed the War in the Reign of Anne) seems to have been a period of depopulation. The decrement however appears not to have been general over the whole Country; in Yorkshire and the Four Northern Counties, as well as in the Counties of Derby, Stafford, Gloucester, Hants, and Sussex, the Baptisms exceeded the Burials; the parts of the Country in which the Burials more particularly exceeded the Baptisms, were the Metropolis, Wales, and the Counties of Lancaster, Lincoln, Chester, Bedford, Berks, and Somerset.*

STATEMENT of the Total Number of *Marriages, Baptisms, and Burials*, in each of the Five Divisions of the *METROPOLIS* of *GREAT BRITAIN*, in each of Nine Years from 1700 to 1780, and in each of the Forty Years 1781–1820

**** The Topographical exhibition of the Parishes which compose the British Metropolis, will shew the extent of its Population at different Periods, and the direction in which it more particularly inclines to extend, the Numbers in the* CITY OF LONDON *within the Walls, appear to have sensibly diminished, to which diminution, various causes have contributed. The Scite of the New Post Office completed in* 1829, *occupied a space which in* 1801, *contained more than* 1,000 *Inhabitants. The Bank of England, and other Public Buildings, at earlier Periods displaced proportionate Numbers, but the main cause of the seeming diminution of Numbers in this division of the Metropolis arises, from the tendency which has prevailed for many Years past, to desert it as a permanent residence, by which most of the Largest Houses are now used only as Offices for Business during the day.* ☞ *It will be noticed that from* 1801, *there appears a sudden diminution in the* City of London *without the Walls. This arises from the Parishes of* St. John Horsley Down, *and of* St. George, St. Olave, St. Saviour, *and* St. Thomas, *in the Borough of Southwark, up to* 1800 *inclusive, having been included in that division; but subsequent to* 1800, *in the division of Out Parishes, within the Bills of Mortality, which reconciles at the same time the otherways seeming disproportionate increase subsequent to* 1800, *in that division. The relative difference between the Baptisms and Burials in each of these divisions is a feature that deserves attention.*

*** The Statement below shews the aggregate result of the Parish Registers of the METROPOLIS, composed of the five Divisions, as exhibited on the preceding page, and distinguishes the proportion of Males and Females, both Baptised and Buried, and the excess in each Year of Burials over Baptisms, and the converse. *Although in the aggregate of all England and Wales, the Baptisms have considerably exceeded the Burials in each Year since* 1740, *the excess of Burials over Baptisms in the Metropolis, will be seen to have continued down to* 1801, *since which Year a striking change has taken place in the relative increase of Baptisms, and decrease of Burials in every part of the Country; it deserves attention that whilst in Lancashire, the West Riding of Yorkshire, and some other parts of the Country, the Burials in* 1801, *very considerably increased, there was in the Metropolis contrary to what might have been expected a very considerable diminution.*

The Statement of the Total Number of Baptisms and Burials, in all England and Wales, in each of the Seven Years 1798–1804, *will shew more clearly the Counties and the Years in which they were affected by the high price of Subsistence in* 1800–1, *in some it seems to have produced its effect in* 1800; *in others, in* 1801; *and in others, not till* 1802–3; *and in Norfork, and one or two other Counties, but little or no effect appears to have been produced.*

Excess of Burials over Baptisms.

Excess of Baptisms over Burials.

‡‡‡ *The Columns below shew the Total Number of Baptisms and Burials in that part of the Metropolis included within the Bills of Mortality, which comprise the first four divisions of the account on the preceding page. The Worshipful Company of Parish Clerks Publish annually, a Bill of Mortality, which is copied in general into all the Newspapers, but as inaccuracy involves no penalty, the details are not deserving of any very great confidence, although one Year with another, they are perhaps tolerably near approximations to correctness.*

☞ *For the Diseases which occasioned the great Mortality in* 1762–3, *as well as generally,—see Statement of the Mortality of the Metropolis. The Assize of Bread was discontinued in* 1815,—*see Statement relating to the Importation and Exportation of Grain. The Weight of the Quartern Loaf was* 4 lb. 5 oz. 10 drs.

Excess of Baptisms over Burials.

Excess of Burials over Baptisms.

See Statement of GRAIN and FLOUR, Imported, and Exported.

STATEMENT shewing the Number of *Marriages, Baptisms, and Burials*, in the Counties of *LANCASTER*, and in the *West Riding of YORKSHIRE*, at Periods of 10 Years from 1700 to 1780, and in each of the 40 Years 1781–1820; distinguishing in the Baptisms and Burials the proportion of Males and Females, and the excess of Baptisms over Burials.—*** The Population of these 2 Districts in 1820, was as 10½ in *Lancashire* to 8 in the *West Riding*, whilst the Deaths as indicated by the Burials in the 10 Years 1811–20, will be seen to have been in the proportion of 18 in *Lancashire* to little more than 12 in the *West Riding*. This is an additional confirmation to the numerous others shewn in various parts of this Work, of the deleterious effects upon Human life of the Manufacturing operations of *Lancashire*, notwithstanding which, numbers seem to press towards the vortex with accellerating force; and the difference of the Mortality of these 2 Districts from the similarity of their pursuits is remarkable and merits investigation. The results exhibited of the Baptisms and Burials of *Lancashire* prior to 1780, imply its being naturally favorable to health and longevity. The effects of the high Money price of Subsistence in 1800–1, appear to have effected *Lancashire* in a far greater degree than any other part of the Kingdom, the result together with the great reaction in the 3 following Years deserves attention. —*see Notes to the other Statements relating to this same subject.*

STATEMENT shewing the Total Number of *BURIALS*, within the BILLS OF MORTALITY, in each Week of 20 Years, between 1592 and 1666, being Years in which the *Plague* more or less prevailed. *** *The limits of the Bills of Mortality at these periods are defined at page 68; up to* 1625 *inclusive they comprised Numbers* 1—27*; in the following Year, Saint. Margarets, Westminster, was included; in* 1636, *Nos.* 28, 31, 33, *&* 34, *were included; and in* 1647, *St. Paul, Covent Garden; in* 1665 *the whole of the Parishes up to No.* 35 *inclusive being comprised, it makes the extent of Mortality in that Year, in comparison with previous Years (without reference to the extent of limits within which it occurred) appear disproportionately great. It will be seen on referring to the preceding page, that in some Parishes the Mortality was less in* 1665 *than in* 1593, *and in the City within the Walls not materially greater than in* 1593 *and* 1625*;—the comparison throughout deserves attention.*

Weeks ending	*Total Number of BURIALS in each Week of the undermentioned Years.*

The details exhibited on this and the preceding page for the Year 1593, were published separately at that time. On the Plague appearing in 1665, there was further published an account of the four great Plagues, Viz.; 1593, 1603, 1625, and 1636; and in the following Year, Mr. Bell, the then Clerk of the Company of Parish Clerks, published under the Title of "London's Remembrancer;" a true account of every particular Week's Christenings and Mortality, in all the Years of Pestilence, within the cognizance of the Bills of Mortality, being XVIII Years from 1606 to 1665. These were all collated in 1759 by an anonymous Compiler, under the signature of J. P. Esq., F. R. S. and printed in that Year in a confused and inconvenient form, being diffused over more than 30 pages of Quarto. The annexed Statement shews the extent of the Plague in different parts of the World, during the period 1603–1665. —For some particulars relating to still greater virulence of Disease and Mortality in England, between 1345—9, and in different parts of the World from 1345–62,— see following page.

☞ According to an Enumeration made in 1631, the Population of the Parishes Nos. 1—18, page 65, was in that Year 130,178.

The disease below is specified by Mr. Bell in his Remembrancer, *adverted to on the preceding page; it is probably the same as exhibited under the head of* Spotted Fever, *Col. No. 31, in the first period of the exhibition of Diseases; no such disease as Parish infection being therein specified. Great as was the Mortality between 1593 and 1666 as exhibited on this, the next, and two preceding pages, it appears to have been greatly exceeded between 1345 and 1362; between which dates, History informs us (see § 10 of Introduction) that more than 25 millions of People, in different parts of the World, died of a Plague which prevailed during that period:—between July 1348 and Sep. 1349, upwards of 7000 in Yarmouth, 57,000 in Norwich, and 50,000 in London, with its then comparatively limited Population, are stated to have died of its ravages, as well as great Numbers in various parts of England, Wales, and Scotland.*

Proportion reported to have Died of PARISH INFECTION.

STATEMENT shewing the Mortality in each Parish of the METROPOLIS in each of the Years 1593, 1625, 1636, 1665, 1747, 1801, 1823, and 1830, distinguishing the proportion reported to have died of the *PLAGUE*, in each of the first four Years; the Parishes arranged in order of their incorporation with the Company of Parish Clerks; the dates to 28 and following Numbers, denoting the Year in which incorporated.

*1603 was also a great Plague Year, the Mortality according to one account having been 37,294; of which 30,561 are reported to have died of the Plague: and according to another account the Total Mortality was 42,042, and 36,269 of the Plague, but the details of each Parish do not appear to have been published. *** For the origin and progress of the* Bills of Mortality, *see Index,—their merited disrepute will be apparent on examination; in 1830 the Populous Parish of St. George, Hanover Square omitted to make a return, as did St. Ann, Westminster both in 1823 and 1830: the return of St. Luke, Middlesex presents too great a disparity to deserve confidence for its accuracy.*

PARISHES, arranged in *Order of their Incorporation within the Bills of Mortality.*	Number of reference to Topographical Position.	do. to Benefice.	*Total Number of BURIALS, in each of the Years.*				*Proportion, Reported to have died of the PLAGUE, in each Year.*				*Total Number of BURIALS, in each of the Years.*

All Saints, Poplar.

STATEMENT shewing the MORTALITY, in each of the 24 Provinces of *SWEDEN*, and in the City of STOCKHOLM, in the Year 1820; shewing the various *Diseases* under which the Mortality ensued, and distinguishing the Number of Males from the Number of Females; the Provinces arranged in Order of their Total Population. ☞ *The Column of Totals includes* 30 *Males and* 7 *Females Murdered;* 117 *Male and* 21 *Female Suicides; and* 14 *Males and* 3 *Females Executed.*

*** *On comparing this Statement with the London Bills of Mortality, one feature which it presents unfavorable to Sweden, is the Number of Females reported to have died in* Child-bed, *which are as* 3 *in Sweden, to* 2 *within the London Bills of Mortality; The Number* (1838) *of Illegitimate Children dying under a Year Old in Sweden, is considerable, but there is no corresponding data in England, on which to form a comparison; An Account of the Children annually received into all the London Workhouses makes the Number about* 12,000, *of whom, about* 900 *are reported as Illegitimate, and* 200 *Foundlings; The Numbers reported* Drowned, *and to have died of* Drunkenness, *as well, as the* Murders, Suicides, and Executions, *specified above, are ak indications unfavorable to the moral Character of Sweden: The legitimate object, and end of* STATISTICS, *is, to enable the relations and conditions of Society to be correctly understood, whereby its social and moral improvement may be progressively advanced. Unfortunately the object and end of* STATISTICS, *as yet, do not appear to be understood in Sweden, notwithstanding their long continued popularity.*

	PROVINCES arranged in Order of TOTAL POPULATION, *in* 1820.	TOTAL POPULATION *in* 1820.	AGES.						DISEASES.

SYNOPSIS OF DISEASES,

according to the Nosology of Cullen.

Pyrexiæ	5 *Orders*	47	*Genera*
Neuroses	4 *do.*	28	*do.*
Cachexiæ	3 *do.*	24	*do.*
Locales	8 *do.*	59	*do.*
4 *Classes*	23 *Orders*	158	*Genera*

CLASS I. *PYREXIÆ*—*Febrile Diseases.*

1. *Fabres*,— Universal. Emaciation.
   - 76 Atrophia
   - 77 Phthisis
   - 78 Tabes
2. *Phlegmasiæ*,—Inflammations.
   - Continued: 1 Tertiana, 2 Quartana, 3 Quotidiana
   - Intermittent: 4 Synocha, 5 Synochus, 6 Typhus
   - 7 Arthropodosa, 8 Carditis, 9 Cynanche, 10 Cystitis, 11 Diaphragmitis, 12 Enteritis, 13 Gastritis, 14 Glossitis, 15 Hepatitis, 16 Hysteritis, 17 Nephritis, 18 Odontalgia, 19 Ophthalmia, 20 Otitis, 21 Peritonitis, 22 Phlogosis, 23 Phrenitis, 24 Pleuritis, 25 Pneumonia, 26 Podagra, 27 Prosopitis, 28 Rheumatismus, 29 Splenitis
3. *Exanthemata*,— Eruptive Fevers.
   - 30 Aphtha, 31 Erysipelas, 32 Miliaria, 33 Pemphigus, 34 Pestis, 35 Rubeola, 36 Scarlatina, 37 Urticaria, 38 Variocella, 39 Variola
4. *Hamorrhagiæ*,— Hemorrhages.
   - 40 Epistaxis, 41 Hæmatemesis, 42 Hæmaturia, 43 Hæmoptysis, 44 Hæmorrhois, 45 Menorrhagia
5. *Profluvia*,— Fluxes.
   - 46 Catarrhus
   - 47 Dysenteria

CLASS II. *NEUROSES*, Nervous Diseases.

1. *Comata*,— Soporose.
   - 48 Apoplexia, 49 Paralysis
2. *Adynamiæ*,— Defect of Vital Powers.
   - 50 Chlorosis, 51 Dyspepsia, 52 Hypochondriasis, 53 Syncope, 54 Vertigo
3. *Spasmi*,—Spasmodic Diseases.
   - 55 Asthma, 56 Cholera, 57 Chorea, 58 Colica, 59 Convulsio, 60 Diabetes, 61 Diarrhœa, 62 Dyspnœa, 63 Epilepsia, 64 Hydrophobia, 65 Hysteria, 66 Palpitatio, 67 Pertussis, 68 Pyrosis, 69 Raphania, 70 Tetanus, 71 Trismus
4. *Vesaniæ*,— Mental Diseases.
   - 72 Amentia, 73 Mania, 74 Melancholia, 75 Oneirotrita

CLASS III. *CACHEXIÆ*—*Cachetic Diseases.*

1. *Marcores*,— Universal Emaciation.
   - 76 Atrophia, 77 Phthisis, 78 Tabes
2. *Intumescentiæ*,— General Swellings.
   - *Adipose.* 79 Polysarcia
   - *Flatulent.* 80 Physconcria, 81 Pneumatosis, 82 Tympanites
   - *Dropsies.* 83 Anasarca, 84 Ascites, 85 Hydrocele, 86 Hydrocephalus, 87 Hydrometra, 88 Hydrorachitis, 89 Hydrothorax
   - Swellings of the Solids: 90 Physconia, 91 Rachitis
3. *Impetigines*,— Cutaneous Diseases.
   - 92 Elephantiasis, 93 Frambœsia, 94 Icterus, 95 Lepra, 96 Scorbutus, 97 Scrophula, 98 Syphilis, 99 Trichoma

CLASS IV. *LOCALES*—*Local Diseases.*

1. *Dysæthesiæ*,— Diseases of the Senses.
   - 100 Agnosia
     - 1 Amaurosis
     - 2 Anæsthesia
     - 3 Anosmia
     - 4 Caligo
     - 5 Dysecoea
     - 6 Dysopia
     - 7 Paracusis
     - 8 Pseudoblepsis
2. *Dysorexiæ*,— Appetites.
   - Defective: 109 Adipsia, 110 Anaphrodisia, 111 Anorexia
   - Depraved: 112 Bulimia, 113 Nostalgia, 114 Nymphomania, 115 Pica, 116 Polydipsia, 117 Satyriasi
3. *Dyscinesiæ*,— Motion impeded or depraved from defect or perfection of the organ.
   - 118 Aphonia, 119 Contractura, 120 Dysphagia
     - 1 Mutitas
     - 2 Paraphonia
     - 3 Psellismus
     - 4 Strabismus
4. *Apocenoses*,— Increased Discharges.
   - 125 Enuresis, 6 Epiphora, 7 Ephidrosis, 8 Gonorrhœa, 9 Profusio, 130 Ptyalismus
5. *Epischeses*,— Obstructions.
   - 131 Amenorrhœa
     - 2 Dyspermatismus
     - 3 Dysmenia
     - 4 Ischuria
     - 5 Obstipatio
   - 136 Aneurisma, 7 Bubo, 8 Cancer, 9 Clavus, 140 Ecchymoma
   - Hepatici: 1 Exostosis, 2 Ganglion, 3 Hydarthrus, 4 Hydatis, 5 Lapis, 6 Sarcoma, 7 Scirrhus, 8 Varix
6. *Tumores*,— Tumours.
7. *Ectopiæ*,— Parts displaced.
   - 149 Hernia, 150 Luxatio, 1 Prolapsus
8. *Dyskineses*.
   - 152 Caries, 3 Fractura, 4 Herpes, 5 Psora, 6 Tinea, 7 Ulcus, 8 Vulnus

---

Abscessus	..	*Miscarriage*
Abortus		*Pimpled Face*
Acne		*A want of Thirst*
Adipsia	109	*Defect of Vital Power*
Adynamiæ	50—54	*do., or loss of Taste*
Ageustia	100	*Gutta Serena*
Amaurosis	101	*A partial, or total obstruction of the Menses from other causes than Pregnancy, or Old Age.*
Amenorrhœa	131	*Futwity*
Amentia	72	*Loss of the sense of Touch*
Amnesia		*Impotence*
Anæsthesia	102	*Dropsy of the Cellular Membrane*
Anaphrodisia	110	*A preternatural dilatation of an Artery for-*
Anasarca	83	*ming a Tumour.*
Aneurisma	136	*Want of appetite without a disgust for Food*
Angina		*Loss of the sense of Smelling*
Anorexia	111	*A suppression of the Voice without Syncope*
Anosmia	103	*Aphthous Fever*
Aphonia	118	*Increased Discharges*
Aphtha	30	*Apoplexy*
Apocenoses	125—30	*Rheumatic Gout*
Apoplexia	48	*Inflammation of a Joint*
Arthritis Rheumatica		*Small thread-like Worms*
Arthropuosis	7	*Dropsy of the Belly*
Ascarides		*Nervous affections*
Ascites	84	
Asthenia		
Asthma	55	
Atrophia	76	*Nervous Consumption*
Blenorrhœa		
Bronchocele		
Bubo	137	*A swelling of the Lymphatic Glands par-*
		ticularly of the Groin and Exilia.
Bulimia	112	*Canine or Insatiable appetite*
CACHEXIÆ	76—99	*Ill habit of Body*
Calculus Biliosus		
Caligo	104	*A Disease of the Eye*
Cancer	133	*A painful scirrhous Tumour, terminating in a fatal Ulcer.*
Cardialgia		*Heartburn*
Carditis	8	*Inflammation of the Heart*
Caries	152	*A rottenness or Mortification of the Bone*
Catarrhus	46	*Cold*
Cephalœa		*Head Ache*
Chlorosis	50	*Retention of the Menses, or Green Sickness*
Cholera	56	*Vomiting and Purging*
Chorea	57	*St. Vitus's Dance*
Clavus	139	*Corna*
Colica	58	*Colic*
Comata	48—49	*Soporose Diseases*
Constipatio		
Contractura	119	*A rigid Contraction of the Muscles or Joints*
Contusio		
Convulsio	59	*Convulsions*
Crusta-lactea		
Cynanche	9	*Inflammation of the Throat*
Cysterrhœa		
Cystitis	10	*Inflammation of the Bladder*
Dentitis		
Diabetes	60	*Excessive Discharge of Urine*
Diaphragmatis	11	
Diarrhœa	61	*Purging*
Dolores		
Hepatici		
Uteri		
Dysalyses	152—8	
Dysæthesiæ	100—8	*Diseases of the Senses*
Dyscinesiæ	118—24	*Motion impeded or depraved from an Im-*
		perfection of the organ.
Dysecoea	105	*Deafnes*
Dysenteria	47	*Dysentery*
Dysmenorrhœa		*Painful Menstruation*
Dysopia	106	*Difficult Sight*
Dysorexiæ	109—117	*Depraved Appetite*
Dyspepsia	51	*Indigestion*
Dyspermatismus	132	*A slow or impeded emission of semen during*
Dysphagia	120	*coition*
Dyspnœa	62	*A difficulty of deglutition, or swallowing*
Dysuria	133	*Difficulty of Breathing*
do. Calculosa	....	*A suppression or difficulty and pain in discharging the Urine.*

Ecchymoma	140	*Extravasation of swelling of Veins*
Ecthyma		*Large inflamed pustules*
Ectopiæ	149—151	*Parts displaced*
Eczema		*A hot vesicular eruption*
Elephantiasis	92	*Elephant-like eruption*
Enteritis	12	*Inflammation of the Bowels*
Enterodynia		*Pain of the Bowels*
Enuresis	125	*Incontinency, or involuntary flow of Urine*
Ephemera		
Ephidrosis	127	*A violent and Morbid perspiration*
Epilepsia	63	*Epilepsy*
Epiphora	126	*Watery eye, or involuntary flow of tears*
Epischesis	131—5	*Obstructions*
Epistaxis	40	*Bleeding from the Nose*
Erysipelas	31	*St. Anthony's Fire*
Erythema		*A red diffuse rash*
Exanthemata	30—9	*Eruptive Fevers*
Exostosis	141	*A morbid enlargement or hard tumour of a bone.*
Exulceratio Pudendi		
Fatuitas		
Febres	1—6	*Fevers*
Fluor Albus		
Fractura	153	*Fractures*
Frambœsia	93	*Yaws, or Raspberry-like eruption*
Furunculi		
Ganglion	142	*An encysted Tumour formed in the Sheath of a Tendon.*
Gangrene Penilis		
Gastritis	13	*Inflammation of the Stomach*
Gastrodynia		*Stomach Colic*
Glossitis	14	*Inflammation of the Tongue*
Gonorhœa	128	*Preternatural flux of fluid from the Urethra*
Gutta Rosea		
Hectica Adolescentum		
do. Infantilis		
do. Senilis		
Hæmatemesis	41	*Vomiting of Blood*
Hæmaturia	42	*Voiding of Blood by Urine*
Hæmicrania		*Pain of one side of the head*
Hæmiplegia		*Palsy of one side of the body*
Hæmoptysis	43	*Spitting of Blood*
Hæmorrhagiæ	40—5	*Hæmorrhages*
Hæmorrhois	44	*Piles*
Hepatalgia		*Pain in the Liver*
Hepatitis	15	*Inflammation of the Liver*
Hernia	149	*Rupture*
Herpes	154	*Tetters, or Cutaneous Ulcers*
do. Zoster		*Shingles*
Hydarthrus	143	*White Swelling*
Hydatis	144	*Animals formed like a bladder distended with aqueous fluid, found in the cavities of the Body and Viscera.*
Hydrops		*Dropsy*
Hydrocele	85	*do. of the Tunica Vaginalis Testis*
Hydrocephalus	86	*do. in the head*
Hydrometra	87	*do. of the Uterus*
Hydrophobia	64	*Canine Madness*
Hydrorachitis	88	*Water in the Spine*
Hydrothorax	89	*Dropsy in the Chest*
Hypochondriasis	52	*Hypochondriac affections*
Hysteralgia		*Pain of the Womb*
Hysteria	65	*Hysterics*
Hysteritis	16	*Inflammation of the Uterus*
Icterus	94	*Jaundice*
Ichthyosis		*Fish Skin Disease*
Impetigines	92—9	*Cutaneous Disease*
Impetigo		*Running Tetter*
Inflammatio Pudendi		*Inflammation of contiguous surfaces*
Intertrigo		*General Swellings*
Intumescentia	79—91	*Suppression of Urine*
Ischuria	134	*Leprosy*
Lepra	95	
Lethargus		*The Whites*
Leucorrhœa		*A purply eruption*
Lichen		
Liver Mannum		*Local Diseases*
Locales	100—58	
Lumbago		*Long round Worm*
Lumbricus		*Ene sted Tumour*
Lupia	145	

Luxatio	150	*Dislocation*
Mania	73	*Madness, with Violenc*
Marasmus		*Worms*
Marcores	76—8	*Universal emaciation*
Melancholia	74	*Melancholy*
Meloena	45	*Flooding, or excessive menstruation*
Menorrhagia	32	*Miliary Fever*
Miliaria		
Morbi Hepatici		*A Tubercular Disease*
Molluscum		
Morbi		
Mutitas	121	*Dumbness*
Nephralgia	17	*Pain in the Kidneys*
Nephritis		*Inflammation of the Kidneys*
Neuroses	48—75	*Nervous Diseases*
Nodositas		
Noli me tangere		
Nostalgia	113	*Vehement longing to return home*
Nymphomania	114	*do. desire for coition in Women*
Obesitas	135	*Costiveness*
Obstipatio		*Tooth Ache, inflammation of*
Odontalgia	18	*Disturbed Sleep*
Oneirodynia	75	*Inflammation of the eye*
Opthalmia	19	*Ear Ache*
Otalgia	20	*Inflammation of the ear*
Otitis		
Palpitatio	66	*Palpitation of the Heart*
Paracusis	107	*Depraved Hearing*
Paralysis	49	*Palsy*
Paraphonia	122	*Alteration of the Voice*
Paraplegia		*Palsy of the lower limbs*
Parotis		
Pemphigus	33	*Vesicular Fever, eruptive*
Peripneumonia		
do. notha		
Peritonitis	21	*Inflammation of Peritoneum*
Pernio		*Whitlow*
Pertussis	67	*Hooping Cough*
Pestis		*Plague*
Petechiæ sine Febre		*see Purpura*
Phlegmasiæ	7—29	*Inflammations*
Phlegmatia		*A painful swelling in one limb*
Phlethora		
Phlogosis	22	*Inflammation*
Phthisis	77	*Pulmonary Consumption*
Phthirinsis		*Lousy Disease*
Phrenitis	23	*Inflammation of the Brain*
Phymata		
Physconia	93	*Enlargement of the abdomen*
Physometra	80	*A windy swelling of the Uterus*
Pica	115	*Longing for unnatural food*
Pityriasis		*A dusky brawny eruption*
Pleuritis	24	*Inflammation of the Pleura*
Pleurodyne		
Pneumatosis	81	*Windy Swelling*
Pneumonia	25	*Inflammation of the Lungs*
Podagra	26	*The Gout*
Polydipsia	116	*Excessive Thirst*
Polysarcia	79	*Corpulency, or Obesity*
Porrigo		*Scald Head, Ringworm, see Tinea*
Profluvia	46—7	*Fluxes*
Profusio	129	*A passive loss of Blood*
Prolapsus ani		*A protrusion or falling down of a part that is uncovered.*
do. uteri		
Prostitis	27	*Inflammation of prostrate Gland*
Prurigo		*Itching pimply eruption*
Psellismus	123	*Defect, or hesitation of Speech*
Pseudoblepsis	108	*An imaginary, or depraved vision of objects*
Psora	155	*Itch*
Psoriasis		*Scaly Tetter*
Ptyalismus	130	*Salivation, or increased secretion of Saliva from the mouth.*
Pulmonary Consumpt.		*see Phthisis*
Pulsatio		
Purpura		*Land Scurvy, Purples*
Pyrexia	1—47	*Febrile Diseases*
Pyrosis	68	*Water brash*
Pyuria		
Quartana	2	*Fourth Day Ague*
Quotidiana	3	*Every Day Ague*
Rachitis	91	*Rickets*
Raphania	69	*Raphany*
Rheumatismus	28	*Rheumatism*
Roseola		*A Rose coloured rash*
Rubeola	35	*Measles*
Rupia		*A Vesicular scabbing eruption*
Sarcoma	146	*A Fleshy excrescence*
Satyriasis	117	*Excessive desire for coition in Men*
Scabies		*Itch*
Scarlatina	36	*Scarlet Fever*
Sciatica		
Scrophula	97	*King's Evil*
Scirrhus	147	*Hard indolent Tumour*
Scorbutus	96	*Scurvy*
Spasmi	55—71	*Spasmodic Diseases*
Spasmus		
Splenitis	29	*Inflammation of the Spleen*
Splen mag.		
Strabismus		*Squinting*
Strophulus		*A Red Gum*
Struma		
Surditas		
Sycosis		
Syncope	53	*Fainting*
Synocha	4	*Inflammatory Fever*
Synochus	5	*Mixed, Bilious, or Summer Fever*
Syphillis	98	*Venereal Disease*
Tabes Mesenterica	78	*Wasting away with Hectic Fever*
Tænia		*Tape Worm*
Tenesmus		
Tetanus	70	*Cramp, or rigid Spasm*
Tertiana	1	*Every third day Ague*
Tinea	156	*Scald Head*
Torpor		
Tremor		
Trichoma	99	*Plaited Hair*
Trismus	71	*Locked Jaw*
Tubera		
Tumores	136—148	*Tumours*
Tussis		
Tympanites	82	*Drum Belly*
Typhus	6	*Nervous Fever*
Ulcera Mam.		
Ulcus	157	*Ulcer, or Sore*
Urticaria	37	*Nettle Rash*
Vari		
Varia		
Varicella	38	*Chicken Pox*
Variola	39	*Small Pox*
Varix	148	*Dilatation, or extension of a Vein*
Vermes		
Verminatio		
Verrucæ		
Vertigo	54	*Giddiness*
Vesaniæ	72—5	*Mental Diseases*
Vesicular		
Vomitus Biliosus		
Vulnus	158	*A Wound*

The figures refer to the Genera, Order, and Class of Disease, according to the prefixed Classification of Cullen; *those without a Number have been enumerated by* Drs. Willan and Bateman, *in their respective Works on the Diseases of the Metropolis, but without any Interpretation.*

Although Cullen *enumerates only* 158 *Genera, each Genera partakes more or less of various species,—*Podagra, *or* Gout, *for instance, is elucidated under four heads, Viz.,* Regularis, Atonica, Retrograda, *and* Aberrans; *of* Melancholia, *eight species are defined, and so on with each Genera, from* 2 *to* 8 *or more species.*

AN ACCOUNT of the Number of *DEATHS*, within the BILLS OF MORTALITY under each of 76 heads of *Diseases and Casualties* in each of the 204 Years 1629—1831. Divided into 4 Periods.—Period I.—1629—1689; with an Alphabetical

Years.	Childbed	Diseases incident to *INFANCY*. Abortive and Stillborn.	Chrisomes and Infants.	Convulsions.	Teething.	Worms.	Rickets.	Overlaid and Starved at Nurse.	Mouldshotted	Canker	TOTAL.	Consumption.	Ague and Fever.	Small Pox.	Measles.	Surfeit.	Stopping of the Stomach.	Rising of the Lights.	Bloody Flux.	Bleeding	Apoplexy, and Suddenly.	Palsy.	Dropsy.	Impostume, and Head.	Jaundice.	Gravel, Stone, and Strangury.	Bursten, and Rupture.	Cholick, and Wind.	Cold and Cough.	Quinsy, and Sore Throat.	Spotted Feaver.	Pleurisy.	Lifargum.	Splen.	Gout and Sciatica.	Suddenly.	Vomiting.	Falling Sickness.	King's Evil	Plotula.	French Pox.	Sores and Ulcers.	Scurvy.	Headach	Swine Pox.	Starved.	Mother.

AN ACCOUNT of the Number of *DEATHS*, within the BILLS of MORTALITY, under each of 83 heads of *Disease and Casualties*; (The Diseases

DISEASES INCIDENT TO INFANCY.

Rickets belong to the Order INTUMESCENTIÆ, *or Swelling, in the Class of* CACHEXIÆ; *and Convulsions to the Order of* SPASMI, *in the Class* NEUROSES, *or Nervous Diseases. Column No. 12, are reported under the head of Headmouldshot, Horseshoehead, and Water in the head, and probably partook both of* PHRENITIS *and* HYDROCEPHALUS.

Years	Childbed	Abortive	Stillborn	Chrisomes	Infants	Cancer	Canker	Thrush	Teething	Worms.	Rickets.	Mould-shaked	Overlaid	Convulsions.	TOTAL.

With Twisting of Guts, — Vide Col. No. 80.

Classed according to the Nosology of Cullen,) in each of the 204 Years 1629–1831. Divided into 4 Periods.—Period II.—1690–1739.

	CACHEXIÆ:— *These belong wholly to the Order Impetigines, or Cutaneous Diseases.*					LOCALES:—Local Diseases. *Column No. 58, comprises various Casualties, as well as various Physical Diseases, too trifling in Number to admit of being exhibited in Columnar Order; they are however enumerated in the Alphabetical list or Index.*									MENTAL Diseases. *The Drowned were in all probability partly accidental, but the greater part doubtless resulted from Frenzy or Mental Oppression*							CASUALTIES:— *Chiefly accidental, but many doubtless the result of Depravity.*											Various Diseases:— *Columns Nos. 75–80, would probably be in place under the Order Spasmi, in the Class Neuroses; They appear to partake of the character of the Plague or Peal of 1665, and of the Cholera of 1831–2.*

Classed according to the NOSOLOGY OF CULLEN,) in each of the 204 Years 1629–1831. Divided into 4 Periods. Period III.—1740—1789.

| CACHEXIÆ:— *These belong wholly to the Order IMPETIGENES, or Cutaneous Diseases.* | | | | | LOCALES:—LOCAL DISEASES. *Column No. 61, comprises various Casualties, as well as various Physical Diseases, too trifling in Number to admit of being exhibited in Columnar Order; they are however enumerated in the Alphabetical list or Index.* | | | | | | | | | MENTAL DISEASES. *The Drowned were in all probability partly accidental, but the greater part doubtless resulted from Frenzy or Mental Oppression.* | | | | | | CASUALTIES:— *Chiefly accidental, but many doubtless the result of Depravity. Chicken Pox, Col. No. 79 belongs to the Order Exanthemata, Class Pyrexiæ.* | | | | | | | | |

Years	Chilcwd	Miscarriage	DISEASES INCIDENT TO INFANCY — *Convulsions, belong to the Order of* SPASMI, *in the Class* NEUROSES, *or Nervous Diseases. Column No. 10, are reported under the head of Headmouldshot, Horseshoehead, and Water in the head, and probably partook both of* PHRENITIS *and* HYDROCEPHALUS. — Abortion and Stillborn.	Cancer	Thrush	Teething.	Worms.	Croup	Cough, and Hooping Cgh.	Dropsy in the Brain.	Convulsions.	TOTAL.	Total, reported to have died, under 5 Years of age — see Statement of Ages.	CACHEXIÆ: — INTEMPERATE, or Swellings: — Dropsy.	IMPETIGINES, or Cutaneous Diseases. — Jaundice.	King's Evil.	French Pox.	Scurvy.	PYREXIÆ: — FEBRILE DISEASES. — Fever	PHLEGMASLÆ, or Inflammatory Diseases. — Inflammation.	Pleurisy.	Livergrown.	Quinsy and Sore Throat.	Gout & Sciatica.	Rheumatism.	EXANTHEMATA, or Eruptive Fevers. — St. Anthony Fire.	Small Pox.	Measles.	Chicken Pox.	HÆMORRHAGIÆ. — Bleeding	Flux.	Cold.	NEUROSES: — NERVOUS DISEASES. — *Apoplexy and Suddenly are termed Soporose; the remainder belong to the order* SPASMI. *See Note to Columns, Nos. 75–80, in second period* — Apoplexy, and Suddenly.	Consumption.	Asthma, and Tisic &c.	Palsy.	Colick, and Wind.	Spasm.	Stoppage in the Stomach	Vomiting, from Surfeit.	Diarrhœa and Dysentery.	Cramp	Hydrophobia

Classed according to the NOSOLOGY OF CULLEN,) in each of the 204 Years 1629 - 1831 Divided into 4 Periods.—Period IV.—1790—1831.

LOCALES:—LOCAL DISEASES.

Column No. 53, comprises various Casualties, as well as various Physical Diseases, too irregular in Number to admit of being exhibited in Columnar Order; they are however enumerated in the Alphabetical list or Index.

1 Jaw-locked.	2 Inquinum.	3 Abscess.	4 Gravel, Stone and Strangury	5 Bursten, and Rupture.	6 Sores and Ulcers.	7 Pitfula.	8 Fractures.	9 Bite.	10 Various.

CASUALTIES:—

Chiefly accidental, but many doubtless the result of depravity. Ague & Mortification were omitted in their proper place, the former should have been under the Order Pyrexiæ; and Mortification under Locales.

18 Broken Limbs	19 Bruised.	20 Burnt.	21 Scalded.	22 Starved.	23 Smothered.	24 Suffocated.	25 Poisoned.	26 Murdered.	27 Killed.	28 Executed.	29 Fright.	30 Frozen.
